Volume 10125

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIEDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

ISSN: 0277-786X
ISSN: 1996-786X (electronic)

ISBN: 9781510606913

**Paper Numbering:** Proceedings of SPIE follow an e-First publication model. A unique citation identifier (CID) number is assigned to each article at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Proc. of SPIE Vol. 10125 1012501-3
Lateral shearing properties of twisted nematic liquid-crystal cell and its potential application to differential interference contrast imaging (Invited Paper) [10125-28]

Generation of optical vortices with controllable topological charges and polarization patterns [10125-29]

LENSES AND DIFRACTIVE OPTICS

Cholesteric microlenses and micromirrors in the beetle cuticle and in synthetic oligomer films: a comparative study (Invited Paper) [10125-30]

Active liquid-crystal deflector and lens with Fresnel structure (Invited Paper) [10125-31]

Recent advances in liquid-crystal fiber optics and photonics (Invited Paper) [10125-32]

Low-voltage binary operation of liquid-crystal Fresnel lens with surface relief structure [10125-33]

Experimental characterization of a F/1.5 geometric-phase lens with high-achromatic efficiency and low aberration [10125-42]

EMERGING TECHNOLOGIES AND DISPLAYS

Optical homogenizing effects in nanoparticle-embedded liquid-crystal devices (Invited Paper) [10125-35]

Fast in-plane switching of nematic liquid crystals by two-dimensional confinement with virtual walls (Invited Paper) [10125-36]

Smectic hybrid oligo(dimethylsiloxane) liquid crystal for nanopatterning (Invited Paper) [10125-58]

Amorphous blue phase III polymer scaffold as a sub-millisecond switching electro-optical memory device [10125-37]

Smart windows using polymer-networked liquid crystals doped with push-pull azobenzene [10125-39]

Electrothermo-optical effect in liquid crystals and its applications [10125-40]

Full-color cholesteric liquid crystal reflective films with narrow linewidth [10125-38]

3D, AR, AND VR DISPLAYS I

Application of LC and LCoS in Multispectral Polarized Scene Projector (MPSP) (Invited Paper) [10125-57]

Holographic and light-field imaging for augmented reality (Invited Paper) [10125-43]
Wide color gamut LCDs with narrow green emitting films [10125-46]

3D, AR, AND VR DISPLAYS II

Fast-response LCDs for virtual reality applications (Invited Paper) [10125-47]
Wide-temperature high-speed operation of a nematic liquid crystal cell [10125-50]

POSTER SESSION

Liquid crystal gratings for advanced control of polarized light propagation fabricated by one-step multiple beam holographic photoalignment [10125-51]
Fabrication of anisotropic diffractive optical element by using polarization drawing method based on galvanometer scanner [10125-53]
Authors

Numbers in the index correspond to the last two digits of the seven-digit citation identifier (CID) article numbering system used in Proceedings of SPIE. The first five digits reflect the volume number. Base 36 numbering is employed for the last two digits and indicates the order of articles within the volume. Numbers start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B...0Z, followed by 10-1Z, 20-2Z, etc.

Conference Committee

Symposium Chairs

Jean-Emmanuel Broquin, IMEP-LAHC (France)
Shibin Jiang, AdValue Photonics, Inc. (United States)

Symposium Co-chairs

Connie J. Chang-Hasnain, University of California, Berkeley
(United States)
Graham T. Reed, Optoelectronics Research Centre, University of
Southampton (United Kingdom)

Program Track Chair and Conference Chair

Liang-Chy Chien, Kent State University (United States)

Conference Co-chairs

Dick J. Broer, Technische Universiteit Eindhoven (Netherlands)
Igor Muševič, Jožef Stefan Institute (Slovenia)
Tae-Hoon Yoon, Pusan National University (Korea, Republic of)

Conference Program Committee

Etienne Brasselet, Université Bordeaux 1 (France)
Vladimir G. Chigrinov, The Hong Kong University of Science and
Technology (Hong Kong, China)
Harry J. Coles, University of Cambridge (United Kingdom)
Antonio Martins Figueiredo Neto, Universidade de São Paulo (Brazil)
Andy Y. G. Fuh, National Cheng Kung University (Taiwan)
Tigran Galstian, Centre d’Optique, Photonique et Laser,
Université Laval (Canada)
Hirotsgu Kikuchi, Kyushu University (Japan)
Heinz S. Kitzerow, Universität Paderborn (Germany)
Jan P. Lagerwall, University of Luxembourg (Luxembourg)
Yi-Hsin Lin, National Chiao Tung University (Taiwan)
Akihiro Mochizuki, i-CORE Technology, LLC (United States)
Kristiaan Neyts, Universiteit Gent (Belgium)
Masanori Ozaki, Osaka University (Japan)
Ci-Ling Pan, National Tsing Hua University (Taiwan)
Miha Ravnik, University of Ljubljana (Slovenia)
Ivan I. Smalyukh, University of Colorado at Boulder (United States)
Nelson V. Tabiryan, BEAM Engineering for Advanced Measurements Company (United States)
Timothy J. White, Air Force Research Laboratory (United States)
Ming Hsien Wu, Hamamatsu Corporation (United States)
Shin-Tson Wu, CREOL, The College of Optics and Photonics, University of Central Florida (United States)
Hual Yang, Peking University (China)

Session Chairs
1 Nanostructured Materials and Assemblies I
   Linda S. Hirst, University of California, Merced (United States)

2 Nonlinear Optics and Lasing
   Michael J. Escuti, North Carolina State University (United States)
   Tomasz R. Wolinski, Warsaw University of Technology (Poland)

3 Nanostructured Materials and Assemblies II
   Nicholas L. Abbott, University of Wisconsin-Madison (United States)
   Miha Ravnik, University of Ljubljana (Slovenia)

4 Photoresponsive and Photovoltaic Materials
   Michael Wittek, Merck KGaA (Germany)
   Yo Shimizu, National Institute of Advanced Industrial Science and Technology (Japan)

5 Diffractive Optics
   Dan Luo, South University of Science and Technology of China (China)
   Toshiaki Nose, Akita Prefectural University (Japan)

6 Spatial Light Modulators
   Jun Yamamoto, Kyoto University (Japan)
   Ivan I. Smalyukh, University of Colorado Boulder (United States)

7 Filters, Retarders, and Polarizers
   Slobodan Žumer, University of Ljubljana (Slovenia)
   Gonzague Agez, Centre d’Elaboration de Matériaux et d’Etudes Structurales (France)

8 Lenses and Diffractive Optics
   Hong Hua, College of Optical Sciences, The University of Arizona (United States)
   Jun-ichi Fukuda, National Institute of Advanced Industrial Science and Technology (Japan)
9 Emerging Technologies and Displays
Dirk J. Broer, Technische Universiteit Eindhoven (Netherlands)
Akihiro Mochizuki, i-CORE Technology, LLC (United States)

10 3D, AR, and VR Displays I
Tae-Hoon Yoon, Pusan National University (Korea, Republic of)
Shin-Tson Wu, CREOL, The College of Optics and Photonics, University of Central Florida (United States)

11 3D, AR, and VR Displays II
Byoungho Lee, Seoul National University (Korea, Republic of)
Introduction

Welcome to the proceedings from the 2017 Emerging Liquid Crystal Technologies XII (ELCT-XII) conference. This conference provides a forum for academic and industrial scientists and engineers to present high-impact scientific and technological research on recent advances in materials, devices, and applications. We accepted 58 papers representing the frontier of scientific and technological exploration of liquid crystals in optics, photonics, and display. The ELCT-XII provides an opportunity for enlightened discussions and exchange ideas on frontier science and technologies on advanced liquid crystal materials, and emerging devices and applications.

The Conference Co-chairs and Organizing Committee was thoroughly committed to making your participation at the conference informative, enlightening, and enjoyable as well as productive. We hope you enjoyed the ELCT-XII, and look forward to seeing you in the future conferences.

Liang-Chy Chien
