Fourth Seminar on Novel Optoelectronic Detection Technology and Application (NDTA17)

Weiqi Jin
Ye Li
Editors

24 – 26 October 2017
Nanjing, China

Sponsored by
Division of Information and Electronic Engineering of the Chinese Academy of Engineering (China)
Chinese Society for Optical Engineering (China)
Science and Technology on Low-light-level Night Vision Laboratory (China)
North Night Vision Technology Company, Ltd. (China)

Organized by
Chinese Society for Optical Engineering (China)
Photoelectronic Technology Committee, Chinese Society of Astronautics (China)

Published by
SPIE

Volume 10697
Part One of Two Parts

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.
Contents

xiii Authors
xvii Conference Committee
xxi Introduction

Part One

SESSION 1 OPTOELECTRONIC DETECTION

10697 02  Matching algorithm of missile tail flame based on back-propagation neural network [10697-1]
10697 03  The design of high precision temperature control system for InGaAs short-wave infrared detector [10697-2]
10697 04  Micro-scanning x-ray imaging system super-resolution reconstruction algorithm [10697-4]
10697 05  The analysis of transient noise of PCB P/G network based on PI/SI co-simulation [10697-6]
10697 06  A novel double fine guide sensor design on space telescope [10697-7]
10697 07  2D fluorescence spectra measurement of six kinds of bioagents simulants by short range Lidar [10697-10]
10697 08  Infrared image background modeling based on improved Susan filtering [10697-11]
10697 09  Non-uniform refractive index field measurement based on light field imaging technique [10697-13]
10697 0A  The simulation of laser diffraction effect in optoelectric imaging systems [10697-14]
10697 0B  Design and test of a simulation system for autonomous optic-navigated planetary landing [10697-15]
10697 0C  Observability analysis method for multi-station orbit estimation system based on condition numbers [10697-16]
10697 0D  Ground mobile target detection based on bottom-up and top-down saliency combination [10697-19]
10697 0E  High definition image real-time mosaic design based on FPGA [10697-24]
10697 0F  Investigation of packaging technology for high-speed photodetector modules [10697-26]
Implementation of biological tissue Mueller matrix for polarization-sensitive optical coherence tomography based on LabVIEW [10697-27]

The design of composite monitoring scheme for multilevel information in crop early diseases [10697-28]

1550nm all-fiber coherent wind lidar [10697-30]

The MEMS process of a micro friction sensor [10697-31]

Method for detecting coherence of multiple optical axes [10697-85]

Infrared thermography for inspecting of pipeline specimen [10697-89]

Analysis and application of key technologies to faint laser signal's detection [10697-92]

Development and test of photon counting lidar [10697-93]

Study on the relationship between PM2.5 concentration and visibility in Beijing based on light scattering theory [10697-94]

A method of radar target recognition based on polarization invariant feature [10697-95]

Non-uniform temperature measurement of flat flames using TDLAS [10697-101]

Target 3-D reconstruction of streak tube imaging lidar based on Gaussian fitting [10697-104]

The study of VOPc thin film transistors on modified substrates [10697-107]

Testing system of multiplying electron gain for electron bombarded semiconductor [10697-110]

High performance organic ultraviolet photodetectors based on m-MTDATA [10697-111]

Precision analysis of atmospheric transmittance based on multiple linear regression [10697-115]

Broadband external cavity quantum cascade laser-based sensor for gasoline detection [10697-116]

Silicon macroporous arrays with high aspect ratio prepared by ICP etching [10697-123]

Dual-band quantum well infrared photodetector with metallic structure [10697-124]

Hyperspectral image anomaly detecting based on kernel independent component analysis [10697-126]

The challenge of sCMOS image sensor technology to EMCCD [10697-127]

Bias thermal stability of interferometer fiber optic gyroscope using a polarization-maintaining photonic crystal fiber [10697-129]
The design and application of a multi-band IR imager
Optimal design of a high accuracy photoelectric auto-collimator based on position sensitive detector
Study on off-axis detection of pulsed laser in atmosphere
Research on simulation technology of full-path infrared tail flame tracking of photoelectric theodolite in complicated environment
Study on operational characteristics of Electron-Bombarded Silicon Avalanche Diode (EBSAD) hybrid photodetector
Coaxial digital holography measures particular matter in cloud and ambient atmosphere
Binocular optical axis parallelism detection precision analysis based on Monte Carlo method
Design and application of an array extended blackbody
Retrieval method of aerosol extinction coefficient profile by an integral lidar system and case study
Ranging error analysis of single photon satellite laser altimetry under different terrain conditions
Influence of detector noise and background noise on detection-system
A new approach for electronic image stabilization based on block matching
Pulse shaping system research of CdZnTe radiation detector for high energy x-ray diagnostic
Research on cloud background infrared radiation simulation based on fractal and statistical data
Total ionizing dose effect and damage mechanism on saturation output voltage of charge coupled device
Experimental research on infrared radiation measurement of typical natural background
The design of visible system for improving the measurement accuracy of imaging points
Raman spectroscopy of large-area graphene by wet transfer method
Measurement of the aerosol absorption coefficient with the nonequilibrium process
Design of a long focal length mid-wavelength infrared optical system
10697 1P  A 9.61-W, b-cut Tm,Ho:YAP laser in Q-switched mode operation [10697-198]

10697 1R  Encoder fault analysis system based on Moire fringe error signal [10697-202]

10697 1S  Photo-counting detector for ionosphere far ultraviolet night airglow remote sensing [10697-205]

10697 1T  Optical registration of spaceborne low light remote sensing camera [10697-208]

10697 1U  Application of near-infrared spectroscopy in the detection of fat-soluble vitamins in premix feed [10697-209]

10697 1V  Analysis of off-axis holographic system based on improved Jamin interferometer [10697-213]

10697 1W  A projector calibration method for monocular structured light system based on digital image correlation [10697-214]

10697 1X  Feasibility analysis of EDXRF method to detect heavy metal pollution in ecological environment [10697-219]

10697 1Z  Researching on single photon detection in airborne laser ranging [10697-221]

10697 20  Study on the effects of ion barrier film on photon reflectance of microchannel plate input surface [10697-222]

10697 21  A high-sensitive system of linear temperature sensing based on Raman scattering with an error correction method [10697-224]

10697 22  The Lissajous figure of solitons in two-dimensional Bose-Einstein condensate [10697-229]

10697 23  Development of 10×10 Matrix-anode MCP-PMT [10697-232]

10697 24  A method for testing the spectral transmittance of infrared smoke interference [10697-247]

10697 25  Research on real-time scene simulation based on multi-resolution texture mapping [10697-250]

10697 26  A visual tracking method based on deep learning without online model updating [10697-255]

10697 27  An omnidirectional measurement technology of CPT magnetometer based on coupling of the dark state [10697-256]

10697 28  Study on the propagation properties of laser in aerosol based on Monte Carlo simulation [10697-257]

10697 29  Analysis of the infrared detection system operating range based on polarization degree [10697-259]

10697 2A  Finite element modal analysis of a vehicle-borne lidar cabin [10697-262]
10697 2B Analysis and design of the medium wave infrared polarization co-aperture optical system [10697-264]

10697 2C Research on denoising method based on guided bilateral filter for reconstructed Image in terahertz holography [10697-270]

10697 2D Image recognition on raw and processed potato detection: a review [10697-277]

10697 2E Design and realization of temperature measurement system based on optical fiber temperature sensor for wireless power transfer [10697-285]

10697 2F Real-time pseudo-color processing of infrared images based on FPGA [10697-288]

10697 2G Study on the convex dual-blazed grating [10697-289]

10697 2H Effect of total dose irradiation on Si and InGaAs detectors [10697-290]

10697 2I Preliminary exploration of application based on mid-wave infrared hyperspectral polarization characteristic [10697-291]

10697 2J Infrared image detail enhancement approach based on improved joint bilateral filter [10697-297]

10697 2K Analysis of MTF based on MCP-CMOS [10697-306]

10697 2L Test of contrast of object and background based on ICCD [10697-307]

10697 2M Ultra-violet avalanche photodiode based on AlN/GaN periodically-stacked-structure [10697-310]

10697 2N Improved detection probability of low level light and infrared image fusion system [10697-315]

SESSION 2 ATMOSPHERE OPTICS

10697 2O Fractal properties of optical turbulence profiles [10697-21]

10697 2Q Numerical simulation of the impact of subsonic hemispherical/cylindrical wake on adaptive optics [10697-25]

10697 2R Time-of-flight absolute distance measurement with dual-comb [10697-43]

Part Two

10697 2S Analysis of temperature field in typical parts of motor vehicles [10697-57]

10697 2T The elimination of colour blocks in remote sensing images in VR [10697-61]
10697 2U Using deep learning in image hyper spectral segmentation, classification, and detection [10697-63]

10697 2V Simulation of target scene based on equivalence of MTF of a turbid medium [10697-71]

10697 2X Average polarizability of quantization Bessel-Gaussian Schell-model beams in anisotropic non-Kolmogorov turbulence [10697-102]

10697 2Y Research on atmospheric transmission distortion of Gauss laser using multiple phase screen method [10697-109]

10697 2Z Orbital angular momentum mode of Gaussian beam induced by atmospheric turbulence [10697-113]

10697 30 Using Raman lidar to detect the atmospheric boundary layer temperature in suburb of Beijing [10697-133]

10697 31 Synchronous atmospheric radiation correction of GF-2 satellite multispectral image [10697-142]

10697 32 Optical simulation of flying targets using physically based renderer [10697-163]

10697 33 Design of PM$_{2.5}$ and PM$_{10}$ concentration optical fiber detectors based on Mie scattering [10697-180]

10697 34 Structure and mechanical design for a large-aperture telescope [10697-181]

10697 36 Research progress of free space coherent optical communication [10697-186]

10697 37 Research advances in reflectance spectra of plant leaves [10697-196]

10697 38 Measurement of phase function of aerosol at different altitudes by CCD Lidar [10697-201]

10697 39 Research and implementation of SATA protocol link layer based on FPGA [10697-206]

10697 3A Design of optical axis jitter control system for multi beam lasers [10697-207]

10697 3B A new version of Stochastic-parallel-gradient-descent algorithm (SPGD) for phase correction of a distorted orbital angular momentum (OAM) beam [10697-210]

10697 3C The air quality analysis of Dalian based on the data of AQI [10697-212]

10697 3D Charactering lidar optical subsystem using four quadrants method [10697-218]

10697 3E Analysis of influence and improvement measures on laser weapons induced by laser atmospheric transmission [10697-226]

10697 3G A precise method for adjusting the optical system of laser sub-aperture [10697-237]

10697 3J The analysis of the impact of star sensor calibration precision about single star simulator pin hole size specification [10697-246]
10697 3K Satellite-based technologies used in the detection of aerosol [10697-249]
10697 3L Automatic precise alignment of Sagnac interferometer [10697-258]
10697 3M Research on the peculiarity of optical parameters of atmospheric aerosol in Guangzhou coastal areas [10697-260]
10697 3N Spectral purity study for IPDA lidar measurement of CO₂ [10697-261]
10697 3O A fitting formula for the effective error of angular anisoplanatism in adaptive optics [10697-269]
10697 3P Photonic crystal fiber sensing characteristics research based on alcohol asymmetry filling [10697-271]
10697 3Q Simulation of retrieving the aerosol size distribution from the multi-wavelength optical parameters [10697-273]
10697 3R Influence of relative humidity on optical properties of atmospheric aerosol particles [10697-274]
10697 3T Impact of different BRDF models on the inversion of desert surface emissivities [10697-281]
10697 3U Channel selection of high-spectral resolution interferometer sounder for use in temperature retrieval [10697-282]
10697 3W Design and simulation of 532nm Rayleigh-Mie Doppler wind Lidar system [10697-293]
10697 3X Design and analysis of Fabry-Perot interferometer filter for high spectral resolution Lidar [10697-294]
10697 3Y Design and realization of adaptive optical principle system without wavefront sensing [10697-295]
10697 3Z Research on the adaptive optical control technology based on DSP [10697-296]
10697 40 Analysis of rocket flight stability based on optical image measurement [10697-300]
10697 41 Study on characteristics of the aperture-averaging factor of atmospheric scintillation in terrestrial optical wireless communication [10697-301]
10697 42 Optimum parameters of image preprocessing method for Shack-Hartmann wavefront sensor in different SNR condition [10697-302]
10697 43 Research on the Moon as an exoatmospheric longwave infrared reference [10697-305]
10697 44 Current status of development of low temperature deformable mirrors [10697-308]
10697 45 Nanosecond-laser induced crosstalk of CMOS image sensor [10697-230]

</table>
The spurious response of microwave photonic mixer [10697-144]

Long-period fiber grating fabricated by 800 nm femtosecond laser pulses [10697-150]

Ion beam figuring of highly steep mirrors with a 5-axis hybrid machine tool [10697-155]

Study on the feasibility of ion beam figuring on DKDP crystal [10697-162]

Optoelectronic oscillator utilizing high-Q active ring resonator [10697-169]

Tunable SERS signals of Rhodamine B molecules on Fe3O4@Au nanocomposite substrates controlled by magnetic field [10697-173]

Refractive index sensing property of metallic rectangular slit arrays with two transmission peaks [10697-211]

A new kind of tunable multi-channel wavelength demultiplexer based on multilayer MIM plasmonic nanodisk resonators [10697-217]

Fabrication of the blazed grating for near-infrared spectroscopy [10697-235]

High-brightness tapered laser diodes with photonic crystal structures [10697-272]

Mechanisms of resistance change under pressure for AgNP-based conducting wires [10697-275]

Laser-assisted electrochemical micromachining of mould cavity on the stainless steel surface [10697-287]

SESSION 4 SPACE OPTICAL TRANSMISSION AND NETWORKS

FPGA implementation of full parallel LDPC encoder [10697-32]

Design of spatial oval plane mirror and its support structure [10697-33]

A precise time synchronization method for 5G based on radio-over-fiber network with SDN controller [10697-35]

Investigation on the effect of beam spreading on the bit error rate of space optical chaos communication system under different detector mismatches [10697-36]

Simulation analysis of impulse characteristics of space debris irradiated by multi-pulse laser [10697-37]

Spectrum and power allocation in cognitive multi-beam satellite communications with flexible satellite payloads [10697-38]

A joint equalization algorithm in high speed communication systems [10697-39]

Emitter signal separation method based on multi-level digital channelization [10697-42]
10697 S9  Application of MEMS and micro sensors in the field of space [10697-46]
10697 SA  Research of the key technology in satellite communication networks [10697-53]
10697 SB  Proportional fair scheduling algorithm based on traffic in satellite communication system [10697-55]
10697 SC  Simulation platform of LEO satellite communication system based on OPNET [10697-59]
10697 SD  Quantum controlled teleportation when only the sender knows the partially entangled state [10697-62]
10697 SE  Research on vibration signal analysis and extraction method of Gear local fault [10697-66]
10697 SF  Investigation of CSRZ code in FSO communication [10697-70]
10697 SG  Fast optimization of glide vehicle reentry trajectory based on genetic algorithm [10697-80]
10697 SH  Multiband DSB-SC modulated radio over IsOWC link with coherent homodyne detection [10697-81]
10697 SI  Low-cost PMD monitoring by calculating energy difference for PM-QPSK systems [10697-86]
10697 SJ  The slot synchronization on space-ground integration data link [10697-90]
10697 SK  Simulation design of space target tracking system based on radial motion principle [10697-105]
10697 SL  Design and realization of a new algorithm of calculating the absolute position angle based on the incremental encoder [10697-117]
10697 SM  The effect of temperature distribution on reflectors in satellite optical terminals [10697-121]
10697 SN  Simulation and analysis of atmospheric transmission performance in airborne Terahertz communication [10697-128]
10697 SO  Performance investigation of stochastic parallel gradient descent algorithm-based wave-front sensor-less adaptive optics for atmosphere turbulence compensation [10697-135]
10697 SP  Experimental investigation of Turbo-LDPC for high sensitivity coherent optical communications [10697-139]
10697 SQ  Optical burst switching based satellite backbone network [10697-140]
10697 SS  Study of opto-acoustic communication between air and underwater carrier [10697-266]
Authors

Numbers in the index correspond to the last two digits of the seven-digit citation identifier (CID) article numbering system used in Proceedings of SPIE. The first five digits reflect the volume number. Base 36 numbering is employed for the last two digits and indicates the order of articles within the volume. Numbers start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B...0Z, followed by 10-1Z, 20-2Z, etc.

Jin Lu, Tianjin Jinhang Institute of Technology Physics (China)
Introduction

We had the great honor of organizing the Fourth Seminar on Novel Optoelectronic Detection Technology and Application (NDTA17). It was truly a great pleasure for us to greet the more than 300 participants from many different countries that attended this conference. We firmly believe this conference will become an important international event in the field of optoelectronic detection technology.

The Fourth Seminar on Novel Optoelectronic Detection Technology and Application was sponsored by the Division of Information and Electronic Engineering of CAE, (Chinese Society for Optical Engineering), the Science and Technology on Low-light-level Night Vision Laboratory and North Night Vision Technology Company, Ltd., and was organized by the Chinese Society for Optical Engineering and Photoelectronic Technology Committee.

The purpose of this conference is to provide a forum for the participants to report and review innovative ideas and up-to-date progress and developments and novel approaches to application in the optoelectronic detection field. It is sincerely hoped that the research and development in optoelectronic detection field will be promoted, and international cooperation enhanced.

On behalf of the Co-chairmen, and the Organization Committee, I would like to heartily thank our sponsors and cooperating organizations for all they have done. Thanks also to the authors for their contributions to the proceedings, to all of the participants and friends for their interest and efforts in helping us to make the conference possible, to the program committee and secretariat for their effective work and valuable advice preparing the conference, and to the SPIE staff for their service publishing the proceedings.

Guofan Jin
