PROCEEDINGS OF SPIE

Infrared Imaging Systems: Design, Analysis, Modeling, and Testing XXVII

Gerald C. Holst
Keith A. Krapels
Editors

19–21 April 2016
Baltimore, Maryland, United States

Sponsored and Published by
SPIE

Volume 9820

Proceedings of SPIE 0277-786X, V. 9820

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

Infrared Imaging Systems: Design, Analysis, Modeling, and Testing XXVII,
edited by Gerald C. Holst, Keith A. Krapels, Proc. of SPIE Vol. 9820, 982001
2016 SPIE · CCC code: 0277-786X/16/$18 · doi: 10.1117/12.2244359

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIEDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from this book:

Paper Numbering: Proceedings of SPIE follow an e-First publication model, with papers published first online and then in print. Papers are published as they are submitted and meet publication criteria. A unique citation identifier (CID) number is assigned to each article at the time of the first publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online, print, and electronic versions of the publication. SPIE uses a six-digit CID article numbering system in which:

- The first four digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B … 0Z, followed by 10-1Z, 20-2Z, etc.

The CID Number appears on each page of the manuscript. The complete citation is used on the first page, and an abbreviated version on subsequent pages. the six-digit CID number.

Contents

vii *Authors*
ix *Conference Committee*

SESSION 1 MODELING I

9820 02 **Investigating binocular summation in human vision using complementary fused external noise** [9820-1]

9820 03 **Method and tool for generating and managing image quality allocations through the design and development process** [9820-2]

9820 04 **Modeling threshold detection and search for point and extended sources** [9820-3]

9820 06 **Reflective band image generation in the night vision integrated performance model** [9820-5]

SESSION 2 MODELING II

9820 07 **Measured system component development for the night vision integrated performance model (NV-IPM)** [9820-6]

9820 08 **Comparison of relative effectiveness of video with serial visual presentation for target reconnaissance from UASs** [9820-7]

9820 09 **Modeling demosaicing of color corrected cameras in the NV-IPM** [9820-51]

9820 0A **Comparing and contrasting 2D versus 1D performance modeling in NV-IPM v1.6** [9820-9]

SESSION 3 MODELING III

9820 0B **Model development and system performance optimization for staring infrared search and track (IRST) sensors** [9820-10]

9820 0C **Is there an optimum detector size for digital night vision goggles?** [9820-11]

9820 0D **Efficient polarimetric BRDF transformations** [9820-52]

9820 0E **A wavelet contrast metric for the targeting task performance metric** [9820-13]

SESSION 4 MODELING IV

9820 0F **Performance assessment of a single-pixel compressive sensing imaging system** [9820-14]

9820 0G **Unified characterization of imaging sensors from VIS through LWIR** [9820-15]

SESSION 5 MODELING V

9820 0I **NIR sensitivity analysis with the VANE** [9820-17]

9820 0J **Foote's Law and its application to cameras** [9820-18]

9820 0K **Spatially resolved 3D noise** [9820-19]

SESSION 6 MODELING VI

9820 0M **Hyperhemispheric multifunction sensors for ground combat vehicles: concept evaluation using virtual prototyping (Invited Paper)** [9820-21]

9820 0N **HIL range performance of notional hyperspectral imaging sensors** [9820-23]

9820 0O **Scenario-based analysis of binning in MWIR detectors for missile applications** [9820-25]

SESSION 7 MODELING VII

9820 0Q **An imaging system detectivity metric using energy and power spectral densities** [9820-27]

9820 0R **The analysis and rationale behind the upgrading of existing standard definition thermal imagers to high definition** [9820-28]

9820 0S **Characterization and recognition of mixed emotional expressions in thermal face image** [9820-29]

SESSION 8 TEST I

9820 0U **Thermal system field performance predictions from laboratory and field measurements (Invited Paper)** [9820-31]

9820 0V **Novel approach to characterize and compare the performance of night vision systems in representative illumination conditions** [9820-32]

9820 0W **Noise measurement on thermal systems with narrow band** [9820-33]

SESSION 9 TEST II

9820 0X **Development of a high-definition IR LED scene projector** [9820-35]

9820 0Y **Display MTF measurements based on scanning and imaging technologies and its importance in the application space** [9820-36]

9820 0Z **Achieving ultra-high temperatures with a resistive emitter array** [9820-37]

9820 10 **Automated and semi-automated field testing of night vision goggles** [9820-38]

SESSION 10 TEST III

9820 13 **Real-time simulation of thermal shadows with EMIT** [9820-41]

SESSION 11 TARGETS, BACKGROUNDS, ATMOSPHERICS, AND SIMULATION I

9820 14 **Simulation of whitecaps and their radiometric properties in the SWIR** [9820-42]

9820 15 **Investigation of the dynamic thermal infrared signatures of a calibration target instrumented with a network of 1-wire temperature sensors** [9820-43]

9820 16 **Image based performance analysis of thermal imagers** [9820-44]

SESSION 12 TARGETS, BACKGROUNDS, ATMOSPHERICS, AND SIMULATION II

9820 17 **Application of cooled IR focal plane arrays in thermographic cameras** [9820-45]

9820 18 **3D flare particle model for ShipIR/NTCS** [9820-46]

9820 19 **Digital imaging and remote sensing image generator (DIRSIG) as applied to NVESD sensor performance modeling** [9820-47]

9820 1A **Multi-spectral synthetic image generation for ground vehicle identification training** [9820-48]

9820 1B **New technologies for HWIL testing of WFOV, large-format FPA sensor systems** [9820-50]

Authors

Numbers in the index correspond to the last two digits of the six-digit citation identifier (CID) article numbering system used in Proceedings of SPIE. The first four digits reflect the volume number. Base 36 numbering is employed for the last two digits and indicates the order of articles within the volume. Numbers start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B...0Z, followed by 10-1Z, 20-2Z, etc.

Conference Committee

Symposium Chair

David A. Logan, BAE Systems (United States)

Symposium Co-chair

Donald A. Reago Jr., U.S. Army Night Vision & Electronic Sensors Directorate (United States)

Conference Chairs

Gerald C. Holst, JCD Publishing (United States)
Keith A. Krapels, U.S. Army Night Vision & Electronic Sensors Directorate (United States)

Conference Program Committee

Gisele Bennett, Georgia Institute of Technology (United States)
Piet Bijl, TNO Defence, Security and Safety (Netherlands)
James A. Dawson, Dynetics, Inc. (United States)
Ronald G. Driggers, St. Johns Optical Systems (United States)
Richard L. Espinola, U.S. Army Night Vision & Electronic Sensors Directorate (United States)
David P. Forrai, L-3 Communications Cincinnati Electronics (United States)
David P. Haefner, U.S. Army Night Vision & Electronic Sensors Directorate (United States)
Jonathan G. Hixson, U.S. Army Night Vision & Electronic Sensors Directorate (United States)
Alan Irwin, Santa Barbara Infrared, Inc. (United States)
Eddie L. Jacobs, University of Memphis (United States)
Terrence S. Lomheim, The Aerospace Corporation (United States)
Teresa L. Pace, L-3 Communications (United States)
Endre Repasi, Fraunhofer-Institut für Optronik, Systemtechnik und Bildauswertung (Germany)
Hector M. Reyes, Raytheon Company (United States)
Joseph P. Reynolds, U.S. Army Night Vision & Electronic Sensors Directorate (United States)
Bernard M. Rosier, ONERA (France)
Michael A. Soel, FLIR Systems, Inc. (United States)
Andrew W. Sparks, L-3 Sonoma EO (United States)
Curtis M. Webb, Northrop Grumman Electronic Systems (United States)

Session Chairs

1 Modeling I
Andrew W. Sparks, L-3 Sonoma EO (United States)

2 Modeling II
Andrew W. Sparks, L-3 Sonoma EO (United States)

3 Modeling III
Jonathan G. Hixson, U.S. Army Night Vision & Electronic Sensors Directorate (United States)

4 Modeling IV
Keith A. Krapels, U.S. Army Night Vision & Electronic Sensors Directorate (United States)

5 Modeling V
James A. Dawson, Dynetics, Inc. (United States)

6 Modeling VI
Hector M. Reyes, Raytheon Company (United States)

7 Modeling VII
Joseph P. Reynolds, U.S. Army Night Vision & Electronic Sensors Directorate (United States)

8 Test I
Alan Irwin, Santa Barbara Infrared, Inc. (United States)
Curtis M. Webb, Northrop Grumman Electronic Systems (United States)
David P. Haefner, U.S. Army Night Vision & Electronic Sensors Directorate (United States)

9 Test II
Alan Irwin, Santa Barbara Infrared, Inc. (United States)
Curtis M. Webb, Northrop Grumman Electronic Systems (United States)
David P. Haefner, U.S. Army Night Vision & Electronic Sensors Directorate (United States)

10 Test III
Alan Irwin, Santa Barbara Infrared, Inc. (United States)
Curtis M. Webb, Northrop Grumman Electronic Systems (United States)
David P. Haefner, U.S. Army Night Vision & Electronic Sensors Directorate (United States)

11 Targets, Backgrounds, Atmospherics, and Simulation I
Richard L. Espinola, U.S. Army Night Vision & Electronic Sensors Directorate (United States)
Endre Repasi, Fraunhofer-Institut für Optronik, Systemtechnik und Bildauswertung (Germany)

12 Targets, Backgrounds, Atmospherics, and Simulation II
Richard L. Espinola, U.S. Army Night Vision & Electronic Sensors Directorate (United States)
Endre Repasi, Fraunhofer-Institut für Optronik, Systemtechnik und Bildauswertung (Germany)
Bernard M. Rosier, ONERA (France)
