Volume 11957

Proceedings of SPIE, 1605-7422, V. 11957

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

Biomedical Vibrational Spectroscopy 2022: Advances in Research and Industry
edited by Zhiwei Huang, Proc. of SPIE Vol. 11957, 1195701
© 2022 SPIE · 1605-7422 · doi: 10.1117/12.2635647

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:
Author(s), "Title of Paper," in *Biomedical Vibrational Spectroscopy 2022: Advances in Research and Industry*, edited by Zhiwei Huang, Proc. of SPIE 11957, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

v *Conference Committee*

RAMAN SPECTROSCOPY AND IMAGING IN BIOMEDICAL DIAGNOSIS II

11957 02 **Accurate Raman indicators of protein synthesis through sparse classification** [11957-10]

11957 03 **Tuberculosis diagnosis from sputum using Raman spectroscopy** [11957-12]

RAMAN SPECTROSCOPY AND IMAGING IN BIOMEDICAL DIAGNOSIS III

11957 04 **Determination of best Raman spectroscopy spatial offsets for transcutaneous bone quality assessments in human hands** [11957-14]

11957 05 **Label-free assessment of hiPS-derived hepatocytes by Raman microscopy** [11957-15]

RAMAN SPECTROSCOPY AND IMAGING IN BIOMEDICAL DIAGNOSIS IV

11957 06 **Multi-configuration Raman spectrometer for early stage diagnosis of oral cancer** [11957-21]

CHEMICAL IMAGING IN MID-IR

11957 07 **SISSI-Bio: the multipurpose infrared laboratory at Elettra synchrotron facility** [11957-31]

SENSITIVE VIBRATIONAL SPECTROSCOPY

11957 08 **Clinical validation of SERS metasurface SARS-CoV-2 biosensor** [11957-36]

COHERENT RAMAN SCATTERING MICROSCOPY AND IMAGING I

11957 09 **Multicolor stimulated Raman scattering microscopy and its applications (Invited Paper)** [11957-38]

11957 0A **Photoswitchable stimulated Raman scattering spectroscopy and microscopy** [11957-41]

COHERENT RAMAN SCATTERING MICROSCOPY AND IMAGING II

- 11957 0B **Near real-time nerve visualization using coherent Raman scattering rigid endoscope and deep learning-based image processing for nerve-sparing surgery [11957-46]**
- 11957 0C **Time-correlated Raman and fluorescence lifetime spectroscopy at megahertz repetition rates [11957-47]**
- 11957 0D **The next generation of mid-IR laser-based refractive index (dispersion) spectroscopy of liquid-phase analytes [11957-48]**
- 11957 0E **Biochemical characterization of saliva of smoking and non-smoking patients by using Fourier-transform infrared spectroscopy [11957-49]**

POSTER SESSION

- 11957 0F **Detailed Raman analysis of protein denaturation using vertical flow method and programmable pump [11957-56]**
- 11957 0G **Laser-based mid-infrared spectroscopy enables in-line detection of protein secondary structure from preparative liquid chromatography [11957-58]**

Conference Committee

Symposium Chairs

Jennifer K. Barton, The University of Arizona (United States)
Wolfgang Drexler, Medizinische Universität Wien (Austria)

Program Track Chairs

Tuan Vo-Dinh, Duke University (United States)
Anita Mahadevan-Jansen, Vanderbilt University (United States)

Conference Chair

Zhiwei Huang, National University of Singapore (Singapore)

Conference Program Committee

Andrew J. Berger, University of Rochester (United States)
Rohit Bhargava, University of Illinois at Urbana-Champaign (United States)
Niels Kröger-Lui, Ruprecht-Karls-Universität Heidelberg (Germany)
Anita Mahadevan-Jansen, Vanderbilt University (United States)
Airton Abrahão Martin, University Brasil (Brazil)
Michael D. Morris, University of Michigan (United States)
Dieter Naumann, Robert Koch-Institut (Germany)
Jürgen Popp, Institut für Photonische Technologien e.V. (Germany)
Nicholas Stone, Gloucestershire Royal Hospital (United Kingdom)
