**Volume 12265**

Proceedings of SPIE 0277-786X, V. 12265

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

Remote Sensing of Clouds and the Atmosphere XXVII, edited by A. Comerón, E. I. Kassianov,  
K. Schäfer, R. H. Picard, K. Weber, U. N. Singh, Proc. of SPIE Vol. 12265,  
1226501 · © 2022 SPIE · 0277-786X · doi: 10.1117/12.2664793

Proc. of SPIE Vol. 12265 1226501-1

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at [SPIDigitalLibrary.org](http://SPIDigitalLibrary.org).

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Remote Sensing of Clouds and the Atmosphere XXVII*, edited by Adolfo Comerón, Evgueni I. Kassianov, Klaus Schäfer, Richard H. Picard, Konradin Weber, Upendra N. Singh, Proc. of SPIE 12265, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

---

**Paper Numbering:** A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

# Contents

v *Conference Committee*

---

## REMOTE SENSING OF CLOUDS, AEROSOLS, TRACE GASES, AND METEOROLOGICAL PARAMETERS

---

- 12265 02 **Exploiting the IASI profiling capability for surface parameters, atmospheric temperature, and water vapour to design emissivity contrast and water deficit indexes to monitor forests' response to droughts and heatwaves [12265-5]**
- 12265 03 **Spatiotemporal variations of PM<sub>2.5</sub> concentrations across Thailand based on long-term remotely sensed observations [12265-7]**
- 12265 04 **Characteristics of Southwest and Northeast monsoon over a few locations in India [12265-8]**

---

## TECHNOLOGIES, TECHNIQUES, AND ALGORITHMS FOR ACTIVE AND PASSIVE REMOTE SENSING

---

- 12265 05 **Methane profile retrieval from IASI: a deep learning inversion approach based on feed-forward neural networks [12265-10]**
- 12265 06 **Comparison of unfiltered shortwave radiances measured by CERES from the Aqua and S-NPP or NOAA20 satellites over closely matched ocean or snow sites [12265-12]**
- 12265 07 **Use of pure rotational Raman channels for lidar measurement of aerosol extinction coefficient: the EARLINET/ACTRIS Barcelona station experience [12265-13]**
- 12265 08 **Field-deployable prototype of the 1.53- $\mu\text{m}$  coherent DIAL for simultaneous vertical profiling of water vapor density and wind speed and direction [12265-16]**

---

## POSTER SESSION

---

- 12265 09 **Performance of a cloud-aerosol Lidar system at 532 and 1064 nm: application to studies of cloud structures and aerosol profiles from the ground [12265-17]**
- 12265 0A **A study on the impact of mountainous terrain on transboundary and local pollution [12265-19]**
- 12265 0B **Availability of polarization information for the hazy aerosol analysis [12265-20]**
- 12265 0C **Aerosol measurements in the tropo- and stratosphere by spectral splitting of Rayleigh and Mie signals within a compact lidar of 1 m<sup>3</sup> [12265-22]**

- 12265 0D **Light scattering database for interpretation of lidar sounding of cirrus clouds** [12265-23]
- 12265 0E **Calculation of light backscattering matrix by the DDA method for arbitrary particles of cirrus clouds for lidar remote sensing** [12265-24]
- 12265 0F **Peculiarities of polarization at vicinity of near backscattering direction by atmospheric irregular crystal particles** [12265-25]
- 12265 0G **Light backscattering properties of atmospheric ice hexagonal particles with a distorted geometry within the physical optics approximation** [12265-26]
- 12265 0H **On the synergic use of satellite microwave and infrared measurements for the estimation of effective radius of ice and liquid water clouds: a regression approach based on random forests** [12265-29]

# Conference Committee

## *Symposium Chair*

**Karsten Schulz**, Fraunhofer-Institut für Optronik, Systemtechnik und Bildauswertung IOSB (Germany)

## *Symposium Co-chair*

**Lorenzo Bruzzone**, Università degli Studi di Trento (Italy)

## *Conference Chairs*

**Adolfo Comerón**, University Politècnica de Catalunya (Spain)

**Evgueni I. Kassianov**, Pacific Northwest National Laboratory  
(United States)

**Klaus Schäfer**, Atmospheric Physics Consulting (Germany)

## *Conference Co-chairs*

**Richard H. Picard**, ARCON Corporation (United States)

**Konradin Weber**, Fachhochschule Düsseldorf (Germany)

**Upendra N. Singh**, NASA Langley Research Center (United States)

## *Conference Programme Committee*

**Lucas Alados-Arboledas**, University de Granada (Spain)

**Aldo Amodeo**, Istituto di Metodologie per l'Analisi Ambientale (Italy)

**Young Joon Kim**, Gwangju Institute of Science and Technology  
(Korea, Republic of)
