

PROCEEDINGS OF SPIE

High-Power Diode Laser Technology XXII

**Mark S. Zediker
Erik P. Zucker
Jenna Campbell**
Editors

**28–30 January 2024
San Francisco, California, United States**

Sponsored and Published by
SPIE

Volume 12867

Proceedings of SPIE 0277-786X, V. 12867

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

High-Power Diode Laser Technology XXII, edited by Mark S. Zediker,
Erik P. Zucker, Jenna Campbell, Proc. of SPIE Vol. 12867, 1286701
© 2024 SPIE · 0277-786X · doi: 10.1117/12.3029978

Proc. of SPIE Vol. 12867 1286701-1

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:
Author(s), "Title of Paper," in *High-Power Diode Laser Technology XXII*, edited by Mark S. Zediker, Erik P. Zucker, Jenna Campbell, Proc. of SPIE 12867, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

vii *Conference Committee*

SESSION 1 HIGH POWER LASER DIODES FOR LIDAR I

- 12867 02 **Lidar for autonomous vehicles: trends in lasers and detectors (Invited Paper)** [12867-1]
- 12867 03 **High brightness nanosecond-pulse operation of 905 nm distributed Bragg reflector tapered-ridge-waveguide lasers with multiple active regions** [12867-2]
- 12867 04 **Designing high-power lasers for on-chip solid state FMCW LiDAR** [12867-3]
- 12867 05 **Design and fabrication of optical waveguides for high-power density laser diodes for LiDAR applications** [12867-6]

SESSION 2 HIGH POWER LASER DIODES FOR LIDAR II

- 12867 06 **Advancements in high-brightness tapered diode laser amplifiers (Invited Paper)** [12867-7]
- 12867 07 **Deep ICP-RIE etched trenches with sidewall slope control of GaAs-based high-power 905nm pulsed laser diodes** [12867-8]
- 12867 08 **1550 nm broad area large optical cavity laser with 4.9 W CW output power** [12867-5]

SESSION 3 BLUE LASER DIODE MODULES AND SYSTEMS

- 12867 09 **High efficiency processing of copper materials with pulse-driving mode using high-brightness blue laser oscillator** [12867-10]
- 12867 0A **High-power blue laser and copper welding with near-infrared fiber laser** [12867-11]
- 12867 0B **High-power and high-luminance blue laser module using GaN-based laser diodes** [12867-12]
- 12867 0C **In-fiber stabilization of high-power blue multiemitter modules** [12867-14]
- 12867 0D **Manufacturing and reliability analysis of high-brightness blue light semiconductor laser** [12867-13]

SESSION 4 LASER DIODE RELIABILITY

- 12867 OE **Aging mechanisms of broad area high-power ~800nm laser diodes** [12867-15]
- 12867 OF **Advanced facet passivation for high-power edge-emitting laser diodes** [12867-16]
- 12867 OG **Nondestructive, in situ infrared imaging of line defect growth in high-power diode laser cavities** [12867-17]
- 12867 OH **Narrow versus broad waveguide laser diodes: a comparative analysis of self-heating and reliability** [12867-18]
- 12867 OI **Time-resolved analysis of degradation in high-power broad-area lasers with quantum well and quantum dot active regions** [12867-19]

SESSION 5 WAVELENGTH STABILIZATION I

- 12867 OJ **High-power coherent diode arrays (Invited Paper)** [12867-20]
- 12867 OK **Distributed Bragg reflector tapered diode lasers emitting reliably more than 7 W at 1180 nm** [12867-21]
- 12867 OL **High-brightness pumps for fiber lasers based on monolithically grating stabilized diode lasers** [12867-23]
- 12867 OM **High-power single-frequency hybrid external cavity lasers with demonstrated narrow linewidth < 100 kHz** [12867-24]
- 12867 ON **1W fiber output operation at 35 °C of FBG-laser with a GaInAsP laser chip with electric field control layer for fiber Raman amplifier** [12867-25]

SESSION 6 WAVELENGTH STABILIZATION II

- 12867 OO **Wavelength stabilization and feedback sensitivity of multi-kW diode laser stacks** [12867-26]
- 12867 OP **High efficiency on-chip wavelength-stabilized laser diodes** [12867-27]
- 12867 OQ **High-power low-SWaP wavelength stabilized pumps** [12867-28]

SESSION 7 HIGH POWER LASER DIODE DEVICE I

- 12867 OR **Diode pumps for future laser plasma accelerators: perspectives from research and industry (Invited Paper)** [12867-29]

- 12867 0S **Ultra-wide-aperture diode lasers with high brightness through use of buried periodic current structuring** [12867-30]
- 12867 0U **High-temperature DBR lasers for next generation quantum sensing and spectroscopic applications** [12867-33]
- 12867 0V **Advance on the high-power and high-brightness diode laser modules for pumping and direct use applications** [12867-46]
- 12867 0W **Efficient power scaling of broad-area laser diodes from 915 to 1064 nm** [12867-31]

SESSION 8 HIGH POWER LASER DIODE DEVICE II

- 12867 0X **Ultra high-power and highly efficient 9xx nm single emitters with up to 65W output power under CW operation (Invited Paper)** [12867-35]
- 12867 0Y **World highest wall plug efficiency 638-nm red high-power broad area laser diode** [12867-36]
- 12867 0Z **High brightness long lifetime 650nm single-mode laser diodes and arrays for display, printing, and quantum applications** [12867-37]
- 12867 11 **Novel high-power laser modules for drying applications based on VCSEL arrays** [12867-39]
- 12867 12 **Compact-lightweight fiber-coupled diode pump source using a bar approach** [12867-40]
- 12867 13 **Advances in manufacturing technology for low cost QCW diode laser stacks suitable for high energy pumping applications** [12867-41]

SESSION 9 LASER DIODES FOR QUANTUM SYSTEMS

- 12867 14 **High-power diode lasers for quantum technologies (Invited Paper)** [12867-42]

POSTER SESSION

- 12867 17 **Efficient and safe infrared wireless power transfer using resonant beam coupling with fiber-based power amplification in optical systems at 1550 nm for improved efficiency, safety, and performance** [12867-45]

Conference Committee

Symposium Chairs

Stefan Kaierle, Laser Zentrum Hannover e.V. (Germany)
John Ballato, Clemson University (United States)

Symposium Co-chairs

Vassilia Zorba, Lawrence Berkeley National Laboratory
(United States)
Kaoru Minoshima, University of Electro-Communications (Japan)

Program Track Chairs

Akihiko Kasukawa, Furukawa Electric Company (Japan)
Stuart D. Jackson, Macquarie University (Australia)

Conference Chairs

Mark S. Zediker, NUBURU, Inc. (United States)
Erik P. Zucker, Erik Zucker Consulting (United States)
Jenna Campbell, Freedom Photonics, LLC (United States)

Conference Program Committee

Paul A. Crump, Ferdinand-Braun-Institut (Germany)
Stefan W. Heinemann, Consultant (United States)
Yasumasa Kawakita, Furukawa Electric Company, Ltd. (Japan)
Harald Koenig, ams-OSRAM International GmbH (Germany)
Volker Krause, Laserline GmbH (Germany)
Robert Martinsen, nLIGHT, Inc. (United States)
Stewart D. McDougall, TRUMPF Photonics, Inc. (United States)
René Todt, Coherent Corporation (Switzerland)
Yuji Yamagata, Fujikura Ltd. (Japan)
