PROCEEDINGS OF SPIE

International Conference on Remote Sensing, Mapping, and Image Processing (RSMIP 2024)

Ram Bilas Pachori
Lei Chen
Editors

19–21 January 2024
Xiamen, China

Organized by
Northwest University (China)

Sponsored by
Shandong University (China)
AEIC Academic Exchange Information Centre (China)

Published by
SPIE

Volume 13167

Part One of Two Parts

Proceedings of SPIE 0277-786X, V. 13167

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

International Conference on Remote Sensing, Mapping, and Image Processing (RSMIP 2024),
edited by Ram Bilas Pachori, Lei Chen, Proc. of SPIE Vol. 13167, 1316701
© 2024 SPIE · 0277-786X · doi: 10.1117/12.3034560

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIEDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:
Author(s), "Title of Paper," in *International Conference on Remote Sensing, Mapping, and Image Processing (RSMIP 2024)*, edited by Ram Bilas Pachori, Lei Chen, Proc. of SPIE 13167, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B … 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

xi *Conference Committee*

Part One

SESSION 1 OPTICAL REMOTE SENSING DETECTION AND LOCALIZATION METHOD

13167 02 **Recent trends in convective and stratiform rain rate under tropical cyclones and non-tropical cyclones conditions using satellite remote sensing data** [13167-19]

13167 03 **Research on remote sensing image object detection algorithm based on deep learning** [13167-103]

13167 04 **Research on dynamic monitoring of green mine geological environment based on remote sensing and GIS technology** [13167-122]

13167 05 **Analysis of the fluence of multi-sources DEM in remote sensing image ortho-rectification** [13167-7]

13167 06 **Analysis of extreme rainstorm process using multi-source remote sensing data: a case study of Shenyang** [13167-17]

13167 07 **Small object detection in satellite remote sensing images based on super-resolution enhanced DETR** [13167-50]

13167 08 **Lightweight remote sensing object detection algorithm for spaceborne edge computation** [13167-6]

13167 09 **Research on web map tile services based on PostgreSQL** [13167-34]

13167 0A **Research on information integration technology of space optical remote sensing sensor** [13167-74]

13167 0B **Human contour segmentation algorithm for radiotherapy-assisted positioning** [13167-5]

13167 0C **Improved design of satellite magnetic test facility** [13167-95]

13167 0D **A mathematical morphology-based detector for underwater target detection using side-scan sonar images** [13167-37]

13167 0E **Semantic fusion block: enhanced transformer architecture for imbalanced remote sensing image semantic segmentation** [13167-13]

13167 0F **Remote sensing aircraft object detection algorithm based on attention mechanism** [13167-116]

13167 0G **Research on remote sensing small object detection algorithm based on improved YOLOv8** [13167-128]

13167 0H **Deep learning-based active contour model for remote sensing building image segmentation** [13167-29]

13167 0I **Research on sonar image generation technique based on improved CycleGAN** [13167-9]

13167 0J **Remote sensing retrieval model and analysis of sea water transparency based on quasi-analytical algorithm** [13167-71]

13167 0K **A robust image geo-localization architecture with foundation vision model and feature mixing** [13167-132]

13167 0L **Comparison and evaluation of attitude determination methods for the high-resolution satellite GF-7** [13167-3]

13167 0M **Detection of weakly labeled remote sensing images based on adaptive weighted fusion** [13167-63]

13167 0N **Enhancing object detection for remote sensing with dynamic heads in Oriented R-CNN** [13167-42]

13167 0O **An algorithm of simultaneous localization and mapping for mobile robots based on graph optimization** [13167-79]

13167 0P **GAN and semi-supervised learning-based indoor visible light localization system for image sensors** [13167-20]

13167 0Q **A scientometrics analysis of indoor positioning technologies** [13167-130]

13167 0R **Accurate extraction method of surface subsidence information in mining area based on remote sensing image enhancement algorithm** [13167-107]

13167 0S **Research on the extremely small target identification in aerial remote sensing images with negative example enhancement** [13167-41]

13167 0T **Normalized magnetic source intensity localization method based on Gaussian convolutional kernel** [13167-22]

13167 0U **Spatiotemporal pattern evolution for vegetation using remote sensing technology: a case study of Zhoushan Island, China** [13167-110]

13167 0V **Research on high-precision intelligent optical remote-sensing measurement system based on fiber optic measurement sensors** [13167-102]

SESSION 2 TOPOGRAPHIC MAPPING AND SPATIAL INFORMATION ACQUISITION

13167 0W **Variation characteristics of precipitable water vapor retrieved by CORS in China Southern Power Grid during heavy rainfall** [13167-137]

13167 0X **Surface deformation monitoring and analysis using PS-inSAR in Bortala Mongol Autonomous Prefecture** [13167-127]

13167 0Y **Spatial and temporal variability of ecosystem services and their influencing factors in the Pearl River Delta region of China** [13167-48]

13167 0Z **Speed estimation based on inter-frame difference** [13167-35]

13167 10 **Non-local collaborative denoising via weighted nuclear norm minimization for point cloud** [13167-64]

13167 11 **An improved phase synchronization method for bistatic SAR in echo domain** [13167-125]

13167 12 **Particle size estimation of industrial raw materials based on improved YOLOv7** [13167-70]

13167 13 **Feature extraction network of water scenes based on improved SuperPoint** [13167-62]

13167 14 **Research on 3D terrain reconstruction and step-like surface restoration for natural environment** [13167-87]

13167 15 **Spatiotemporal characteristics of actual evapotranspiration in Northeast China and its influencing factors** [13167-160]

13167 16 **Intersection traffic safety evaluation method based on UAV video data** [13167-21]

13167 17 **Thermal effect analysis of urban land use based on network structure: a case study of Shenyang** [13167-148]

13167 18 **Underground cable laying environment survey method based on wide-angle image distortion removal algorithm** [13167-93]

13167 19 **Application of UAV aerial survey technology to geographic information collection in heritage application of traditional villages** [13167-51]

13167 1A **Analysis of surface subsidence in Shenmu City based on SBAS-InSAR** [13167-97]

13167 1B **Estimation of ground GNSS precipitable water based on atmospheric water vapor region model** [13167-96]

13167 1C **Methodology research on constructing CarMaker scene library based on OpenX scene library** [13167-60]

13167 1D **Improved YOLOv5s tomato leaf small disease spot detection method for embedded devices** [13167-90]

13167 1E **An algorithm for external quality detection of potato incorporating spatial pyramid pooling and up-sampling operators** [13167-113]

13167 1F **A semantic segmentation method for road scenes based on small samples** [13167-129]

13167 1G **Multi-scale fusion CNN for Lanzhou lily diseases detection** [13167-162]

13167 1H **Research on pavement crack detection algorithm based on improved Yolov5** [13167-54]

13167 1I **An adaptive enhancement algorithm for low-illumination images based on HSV chromaticity space** [13167-168]

13167 1J **Outdoor environment segmentation and obstacle detection** [13167-56]

13167 1K **Reference-based attention mechanism and region segmentation line art colorization** [13167-46]

13167 1L **A deep learning enhanced graylevel co-occurrence matrix approach for cancer classification using cytological smears** [13167-133]

13167 1M **Selection of monitoring sections in bridge monitoring systems** [13167-77]

13167 1N **Monitoring technology and data processing methods for Chinese bridges research progress** [13167-32]

13167 1O **Pipeline safety analysis method at geological hazard risk based on InSAR investigation** [13167-120]

13167 1P **Prediction of the potential suitable habitat for *Xanthoceras sorbifolium* bunge based on MaxEnt model** [13167-135]

13167 1Q **A method for motorized route planning based on geographic and geological elements** [13167-47]

13167 1R **Euclidean-distance-based switching adaptive mean filter for salt-and-pepper noise removal** [13167-101]

13167 1S **Urban waterlogging risk assessment and drainage parameters design of Xicen Science and Technology Innovation Center based on satellite remote sensing data** [13167-94]

13167 1T **A high-resolution spatialization of population based on single house and VNP46A2: a case study of Liangzhou District of Wuwei City, Gansu Province** [13167-119]

13167 1U **Research on transformer bolt detection based on machine vision** [13167-98]

Part Two

SESSION 3 IMAGE FEATURE EXTRACTION AND DATA ANALYSIS

13167 1V **Hyperspectral image destriping method based on nonlocal low-rank and total variation** [13167-134]

13167 1W **RSDNet: Res-CBAM-enhanced integration of shallow and deep networks for ultra-high-resolution image segmentation** [13167-14]

13167 1X **Deep attention enhanced networks for medical image segmentation** [13167-126]

13167 1Y **Convolutional neural network model to improve image processing on a C-arm imaging** [13167-99]

13167 1Z **Research on detection algorithm based on improved Yolov5** [13167-4]

13167 20 **A reconstruction method based on guided wave beamforming imaging** [13167-33]

13167 21 **Infrared image simulation of aircraft targets** [13167-115]

13167 22 **Enhancing text extraction from natural scene images through diffusion models** [13167-45]

13167 23 **Research on the construction of image similarity calculation model based on convolutional neural network** [13167-106]

13167 24 **Region-adaptive superpixel segmentation algorithm based on density clustering** [13167-124]

13167 25 **Multi-conv-transformer for large hole and high-resolution image inpainting** [13167-66]

13167 26 **Optimization of CNN-based image retrieval process based on Fourier transform and entropy** [13167-73]

13167 27 **A novel image stitching method based on an unsupervised deep learning algorithm considering homography estimation and networks** [13167-11]

13167 28 **Analysis of low-light image enhancement algorithms** [13167-104]

13167 29 **An improved cubic projection correction algorithm for panoramic images** [13167-143]

13167 2A **Multi-scale region-level graph convolutional network for unsupervised SAR image change detection** [13167-89]

13167 2B **A novel keypoint detection method for optical-SAR image registration** [13167-92]

13167 2C **Research on image recognition technology of overhead transmission line damage** [13167-139]

13167 2D **End-to-end unsupervised road network extraction based on drone images** [13167-36]

13167 2E **Improved algorithm for occlusion detection in large tilt aerial images based on elevation constraints** [13167-30]

13167 2F **A method for retrieving We-map using perceptual hashing algorithms** [13167-109]

13167 2G **Research on super-resolution reconstruction for panoramic annular images** [13167-80]

13167 2H **Semi-supervised medical image classification based on DenseNet and capsule network combination model** [13167-23]

13167 2I **Non-invasive imaging through random media based on boundless point spread function** [13167-68]

13167 2J **Handwritten image recognition based on CNN algorithm** [13167-61]

13167 2K **Post-processing denoising of low-dose CT images based on GAN network** [13167-86]

13167 2L **Deep hierarchical multiscale attention networks for image super-resolution** [13167-78]

13167 2M **UAV visible light image feature matching based on improved whale algorithm** [13167-58]

13167 2N **Improved deep learning image compression model: performance optimization based on convolutional modules and local attention mechanism** [13167-43]

13167 2O **A low-light-level image enhancement algorithm combining Retinex and Transformer** [13167-49]

13167 2P **Cutmix-Plus: an improved helmet wear detection data enhancement technique** [13167-69]

13167 2Q **A multi-plane 2D medical image segmentation method combined with transformers** [13167-123]

13167 2R **Research on underwater sound image enhancement algorithm based on fuzzy theory** [13167-155]

13167 2S **Research on medical image discrimination method based on improved 3D-CNN model** [13167-159]

13167 2T **High-speed jetting microdroplet volume study based on image processing** [13167-121]

SESSION 4 INTELLIGENT SENSING AND TARGET RECOGNITION RESEARCH

13167 2U **Ionospheric irregularities seeker: an application to detect and characterize low-latitude ionospheric plasma irregularities** [13167-25]

13167 2V **An efficient framework for creating depth annotated image datasets with camera and Lidar fusion** [13167-16]

13167 2W **Research on multi-layer perceptron based on TensorFlow** [13167-31]

13167 2X **Research on mining car target recognition method based on machine learning algorithms** [13167-8]

13167 2Y **Shallow convolutional neural network structure for vegetable recognition** [13167-18]

13167 2Z **Accurate identification technology for cross regional behavior of power operators in power grid dispatch operations** [13167-146]

13167 30 **Intelligent analysis based on classroom monitoring videos** [13167-88]

13167 31 **Rapid obstacle perception method based on marine radar** [13167-24]

13167 32 **Crowd recognition based on the fusion of multi-model collaboration** [13167-141]

13167 33 **An improved YOLOv5s target detection algorithm** [13167-140]

13167 34 **Small target detection from DIKW model perspective** [13167-169]

13167 35 **Guidance scheme for object detection visual impairment assistance equipment** [13167-15]

13167 36 **Real-time visual SLAM optimization method based on YOLOv8 and geometric constraints in dynamic scenes** [13167-10]

13167 37 **A comparative study on Chinese named entity recognition with character-level enhancement** [13167-53]

13167 38 **UAV target detection algorithm based on improved fine-grained feature aggregation** [13167-150]

13167 39 **Research on automotive parts recognition based on improved YOLOv5 algorithm** [13167-108]

13167 3A **Rapid reconnaissance of fixed targets on the ground by multiple UAVs** [13167-2]

13167 3B **Human target detection method based on MobileNet-SSD combined with frame difference method** [13167-83]

13167 3C **A lightweight target detection network: ghost-YOLONet** [13167-142]

13167 3D **Classroom facial expression recognition based on improved YOLOv4** [13167-76]

13167 3E **Robust tracking for visual complex environments** [13167-55]

13167 3F **Novel multi-dimensional feature radar target detection method with deep forest** [13167-91]

13167 3G **The research of facial expression image recognition method based on MobileNetV3** [13167-12]

13167 3H **Person re-identification based on two-layer attention and joint learning** [13167-65]

13167 3I **Medical named entity recognition based on data augmentation and structural feature fusion** [13167-75]

13167 3J **Intelligent detection of small sample transmission line defect edge based on convolutional neural networks** [13167-161]

13167 3K **A multi-object video tracking method based on spatial constraints** [13167-112]

13167 3L **Self-correcting text-aware strategy for text-caption** [13167-28]

13167 3M **Research on object detection algorithm based on convolutional neural network** [13167-145]

13167 3N **Adaptive path-tracking control with improved line-of-sight guidance law for unmanned wave glider** [13167-52]

13167 3O **Research on target detection algorithms for site safety equipment** [13167-117]

13167 3P **Digestive tract bubble recognition model based on ViT** [13167-105]

13167 3Q **Research on target recognition based on optical neural networks** [13167-114]

Conference Committee

Conference General Chair

Ram Bilas Pachori, Indian Institute of Technology Indore (India)

Technical Program Committee Chair

Mohamed Elhag, King Abdulaziz University (Saudi Arabia)

Organizing Committee Chair

Chunmei Wang, Northwest University (China)

Publication Chair

Lei Chen, Shandong University (China)

Organizing Committee

Qiangqiang Yuan, Wuhan University (China)
Chunmei Wang, Northwest University (China)
Hongtao Duan, Northwest University (China)
Xuhong Wang, Northwest University (China)
Maja Molna, Josip Juraj Strossmayer University of Osijek (Croatia)
Jan Kratzer, Berlin Institute of Technology (Germany)
Yansheng Li, Wuhan University (China)
Chang Huang, Northwest University (China)
Lei Wang, Northwest University (China)
Jianhong Liu, Northwest University (China)
Peijun Sun, Northwest University (China)
Zhaowu Yu, Fudan University (China)
Ashraf Dewan, Curtin University (Australia)
Azad Rasul, Soran University (Iraq)

Technical Program Committee

Miro Govedarica, University of Novi Sad (Serbia)
Massimiliano Pepe, Università degli Studi G. d'Annunzio Chieti e Pescara (Italy)
Ran Duan, The Hong Kong Polytechnic University (Hong Kong, China)
Jian Yang, China University of Geosciences (China)
Chen Tao, China University of Geosciences (China)
Thota Sivasankar, NIIT University (India)

Yufu Zang, Nanjing University of Information Science and Technology (China)
Qingyun Yan, Nanjing University of Information Science and Technology (China)
Li Wei, Lanzhou Jiaotong University (China)
Qingzhi Zhao, Xi'an University of Science and Technology (China)
Tao Zhang, Beijing Institute of Satellite Information Engineering (China)
Anxin Ding, Hefei University of Technology (China)
