

PROCEEDINGS OF SPIE

AOPC 2024: Computational Imaging Technology

Ping Su
Editor

23–26 July 2024
Beijing, China

Sponsored and Organized by
Chinese Society for Optical Engineering (CSOE) (China)

Technical Cosponsor
SPIE

Published by
SPIE

Volume 13501

Proceedings of SPIE 0277-786X, V. 13501

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

AOPC 2024: Computational Imaging Technology, edited by Ping Su, Proc. of SPIE
Vol. 13501, 1350101 · © 2024 SPIE · 0277-786X · doi: 10.1117/12.3058429

Proc. of SPIE Vol. 13501 1350101-1

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:
Author(s), "Title of Paper," in *AOPC 2024: Computational Imaging Technology*, edited by Ping Su, Proc. of SPIE 13501, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

v *Conference Committee*

COMPUTATIONAL IMAGING TECHNOLOGY

- 13501 02 **Reconstruction of spectral light field image based on compressed spectral imaging**
[13501-2]
- 13501 03 **MFBF-Net: dehazing network based on multifrequency branch fusion** [13501-3]
- 13501 04 **Vortex simultaneous phase-shifting digital holographic microscopy** [13501-4]
- 13501 05 **Median filtering enhanced self-evolving ghost imaging with adaptive illumination patterns**
[13501-5]
- 13501 06 **Design and accuracy analysis of remote sensing imaging system based on
spatio-temporal encoded modulation** [13501-7]
- 13501 07 **Image-free object detection from single-pixel measurements with learned binary patterns**
[13501-8]
- 13501 08 **100 fps single-pixel imaging using Fermat spiral fiber laser array** [13501-9]
- 13501 09 **Depth-NLOS: surface detail reconstruction from depth information in non-line-of-sight
imaging** [13501-10]
- 13501 0A **Studying single neutron high-resolution imaging for ⁶LiF-ZnS scintillation screens based
on particle transport and PSF** [13501-11]
- 13501 0B **Sequences pattern effects on the time and space united coding single photon counting
imaging method** [13501-12]
- 13501 0C **Evaluation of phase enhancement in biological slice based on wavelet fusion** [13501-13]
- 13501 0D **Optimizing shape from polarization using Fourier light field microscopy depth** [13501-16]
- 13501 0E **Phase microscopy using the quadriwave lateral shearing interferometer with continuously
variable shear ratio** [13501-19]
- 13501 0F **High-performance Mueller matrix imaging polarimeter based on liquid crystal variable
retarders** [13501-21]

- 13501 0G **Single-pixel imaging with TCAO and untrained neural network** [13501-22]
- 13501 0H **Laser reflection tomography algorithm based on photon detection characterization echo**
[13501-25]
- 13501 0I **Single-pixel imaging based on a Fermat spiral laser array and an untrained neural network**
[13501-26]

Conference Committee

Conference Chairs

Ping Su, Tsinghua University (China)
Liangcai Cao, Tsinghua University (China)
Xiaopeng Shao, Xi'an Institute of Optics and Precision Mechanics,
Chinese Academy of Sciences (China)

Program Committee

Xueli Chen, Xi Dian University (China)
Jianglei Di, Guangdong University of Technology (China)
Xiang Hao, Zhejiang University (China)
Haoyu Li, Harbin Institute of Technology (China)
Haowen Liang, Sun Yat-sen University (China)
Tingkui Mu, Xi'an Jiaotong University (China)
Fan Wang, Beihang University (China)
Chao Zuo, Nanjing University of Science and Technology (China)
