Volume 8732

Proceedings of SPIE 0277-786X, V. 8732

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

Atmospheric Propagation X, edited by Linda M. Wasiczko Thomas, Earl J. Spillar, Proc. of SPIE
Vol. 8732, 873201 · © 2013 SPIE · CCC code: 0277-786X/13/$18 · doi: 10.1117/12.2030327

The papers included in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. The papers published in these proceedings reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Copying of material in this book for internal or personal use, or for the internal or personal use of specific clients, beyond the fair use provisions granted by the U.S. Copyright Law is authorized by SPIE subject to payment of copying fees. The Transactional Reporting Service base fee for this volume is $18.00 per article (or portion thereof), which should be paid directly to the Copyright Clearance Center (CCC), 222 Rosewood Drive, Danvers, MA 01923. Payment may also be made electronically through CCC Online at copyright.com. Other copying for republication, resale, advertising or promotion, or any form of systematic or multiple reproduction of any material in this book is prohibited except with permission in writing from the publisher. The CCC fee code is 0277-786X/13/$18.00.

Printed in the United States of America.

Publication of record for individual papers is online in the SPIE Digital Library.

SPIEDigitalLibrary.org

Paper Numbering: Proceedings of SPIE follow an e-First publication model, with papers published first online and then in print and on CD-ROM. Papers are published as they are submitted and meet publication criteria. A unique, consistent, permanent citation identifier (CID) number is assigned to each article at the time of the first publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online, print, and electronic versions of the publication. SPIE uses a six-digit CID article numbering system in which:

- The first four digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B … 0Z, followed by 10-1Z, 20-2Z, etc.

The CID Number appears on each page of the manuscript. The complete citation is used on the first page, and an abbreviated version on subsequent pages. Numbers in the index correspond to the last two digits of the six-digit CID Number.

Contents

v *Conference Committee*

SESSION 1 MEASUREMENTS AND SYSTEMS

8732 02 **Atmospheric transmission from an instrument measuring scatter at 1550 nm** [8732-7]
M. J. Vilcheck, C. I. Moore, R. Mahon, J. Murphy, A. Bucholtz, H. R. Burris, L. M. Thomas, W. Rabinovich, U. S. Naval Research Lab. (United States)

8732 04 **Multi-wavelength operation of a control algorithm for mobile FSO node alignment** [8732-10]
D. Zhou, Univ. of Oklahoma-Tulsa (United States); P. G. LoPresti, Univ. of Tulsa (United States); H. Refai, Univ. of Oklahoma-Tulsa (United States)

SESSION 2 MODELING OF THE CHANNEL

8732 05 **Cloud-free line-of-sight estimation for free space optical communications (Invited Paper)** [8732-1]
R. A. Venkat, D. W. Young, Johns Hopkins Applied Physics Lab. (United States)

8732 06 **Simulation of stochastic signals for FSO communication systems through spectral representation** [8732-4]
J. P. G. de Oliveira, Univ. of Pernambuco (Brazil) and FITec - Fundacao para Inovacoes Tecnologicas (Brazil)

8732 07 **Strehl ratio simulation results under strong turbulence conditions for actively compensated free-space optical communication systems** [8732-5]
J. C. Juarez, D. M. Brown, D. W. Young, Johns Hopkins Univ. Applied Physics Lab. (United States)

8732 08 **Sparse spectrum model for the turbulent phase simulations** [8732-3]
M. Charnotskii, Zel Technologies, LLC (United States) and National Oceanic and Atmospheric Administration (United States)

SESSION 3 EXPERIMENTAL ANALYSIS

8732 0A **Buffer requirements of an optical communication system in atmospheric turbulence** [8732-11]
T. T. Leclerc, R. L. Phillips, L. C. Andrews, R. Crabbs, Univ. of Central Florida (United States)

8732 0B **Propagation statistical analysis for SMF-coupled free-space optical signal under weak to medium atmospheric turbulences** [8732-12]
Y. Arimoto, National Institute of Information and Communications Technology (Japan)

8732 0C **Wavelength diversity assessment of fiber bundle receiver under misalignment and turbulence** [8732-14]
P. G. LoPresti, W. Yi, E. Rohlman, Univ. of Tulsa (United States); H. Refai, Univ. of Oklahoma-Tulsa (United States)

SESSION 4 HIGH ENERGY AND BEAM CONTROL ANALYSIS

8732 0D **A nonlinear OPC technique for laser beam control in turbulent atmosphere** [8732-17]
V. Markov, A. Khizhnyak, Advanced Systems & Technologies, Inc. (United States); P. Sprangle, U. S. Naval Research Lab. (United States) and Univ. of Maryland, College Park (United States); A. Ting, U. S. Naval Research Lab. (United States); L. DeSandre, Office of Naval Research (United States); B. Hafizi, U. S. Naval Research Lab. (United States)

8732 0G **Scattering from a rough surface in presence of atmospheric turbulence** [8732-16]
S. Basu, Air Force Institute of Technology (United States) and Oak Ridge Institute for Science and Education (United States); M. W. Hyde, Air Force Institute of Technology (United States); J. E. McCrae, Air Force Institute of Technology (United States) and Oak Ridge Institute for Science and Education (United States); S. T. Fiorino, Air Force Institute of Technology (United States)

8732 0H **PITBUL: a physics-based modeling package for imaging and tracking of airborne targets for HEL applications including active illumination** [8732-18]
N. R. Van Zandt, Air Force Institute of Technology (United States); J. E. McCrae, Air Force Institute of Technology (United States) and Oak Ridge Institute for Science and Education (United States); S. T. Fiorino, Air Force Institute of Technology (United States)

Author Index

Conference Committee

Symposium Chair

Kenneth R. Israel, Major General (USAF Retired) (United States)

Symposium Cochair

David A. Whelan, Boeing Defense, Space, and Security (United States)

Conference Chairs

Linda M. Wasiczko Thomas, U.S. Naval Research Laboratory (United States)
Earl J. Spillar, Air Force Research Laboratory (United States)

Conference Program Committee

Ammar Al-Habash, Raytheon Space & Airborne Systems (United States)
Gary Baker, Lockheed Martin Space Systems Company (United States)
Harris R. Burris Jr., U.S. Naval Research Laboratory (United States)
Gary G. Gimmestad, Georgia Tech Research Institute (United States)
Ken J. Grant, Defence Science and Technology Organisation (Australia)
Juan C. Juarez, Johns Hopkins University Applied Physics Laboratory (United States)
Christopher I. Moore, U.S. Naval Research Laboratory (United States)
William S. Rabinovich, U.S. Naval Research Laboratory (United States)
Jonathan M. Saint Clair, The Boeing Company (United States)
David H. Tofsted, U.S. Army Research Laboratory (United States)
Morio Toyoshima, National Institute of Information and Communications Technology (Japan)
Cynthia Y. Young, University of Central Florida (United States)

Session Chairs

1 Measurements and Systems
Juan C. Juarez, Johns Hopkins University Applied Physics Laboratory (United States)

2 Modeling of the Channel
Harris R. Burris Jr., U.S. Naval Research Laboratory (United States)

3 Experimental Analysis
Linda M. Thomas, U.S. Naval Research Laboratory (United States)

4 High Energy and Beam Control Analysis
Ammar Al-Habash, Raytheon Space & Airborne Systems (United States)
