Volume 11539

Proceedings of SPIE 0277-786X, V. 11539

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

Technologies for Optical Countermeasures XVII; and High-Power Lasers: Technology and Systems, Platforms, Effects IV,
edited by David H. Titterton, Robert J. Grasso, Mark A. Richardson, Willy L. Bohn, Harro Ackermann, Proc. of SPIE
Vol. 11539, 1153901 · © 2020 SPIE · CCC code: 0277-786X/20/\$21 · doi: 10.1117/12.2584642

Proc. of SPIE Vol. 11539 1153901-1

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Paper Numbering: *Proceedings of SPIE* follow an e-First publication model. A unique citation identifier (CID) number is assigned to each article at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

LASER EFFECTS

- 11539 07 **Out-of-band laser damage to an anti-reflection coated germanium window** [11539-4]
- 11539 08 **Shift-free fixed-line laser protection filter technology** [11539-5]
- 11539 09 **Countermeasure Leveraging Optical Attractor Kits (CLOAK): interpretational disruption of a visual-based workflow** [11539-6]

LASER ARCHITECTURES FOR POWER SCALING AND PLATFORMS

- 11539 0A **30kW laser experiments against drones (Invited Paper)** [11539-7]
- 11539 0C **Investigations of transient thermal optics effects in 10-kW fiber laser effector** [11539-9]
- 11539 0D **Numerical simulation of terahertz radiation by laser-driven plasma dipole oscillation** [11539-10]

FIBER LASERS, BEAM COMBINING AND INTERACTION

- 11539 0H **Filaments and post-filaments formation during high-power Ti:sapphire laser pulses propagation in air and optical glasses** [11539-13]
- 11539 0I **The effects of M^2 factor on steel materials** [11539-14]

POSTER SESSION

- 11539 0K **Spatial beam quality analysis of mid-wave infrared quantum cascade lasers** [11539-16]
- 11539 0L **Strategy of achieving high beam quality on spatial intensity and wavefront simultaneously in high power lasers** [11539-17]
- 11539 0M **Space-based assets, applications, user importance, and maritime vulnerabilities** [11539-22]
