Volume 12055

Proceedings of SPIE 0277-786X, V. 12055

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

Advances in Patterning Materials and Processes XXXIX, edited by Daniel P. Sanders, Douglas Guerrero, Proc. of SPIE Vol. 12055, 1205501 · © 2022 SPIE · 0277-786X · doi: 10.1117/12.2643338

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIEDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:
Author(s), "Title of Paper," in *Advances in Patterning Materials and Processes XXXIX*, edited by Daniel P. Sanders, Douglas Guerrero, Proc. of SPIE 12055, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Publication of record for individual papers is online in the SPIE Digital Library.

SPIE. DIGITAL LIBRARY

SPIEDigitalLibrary.org

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B … 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

vii Conference Committee

HARDWARE AND PROCESS OPTIMIZATION

12055 02 **Modeling of SiN inner spacer deposition in gate-all-around nanosheet FET process** [12055-29]

12055 03 **EUV based multi-patterning schemes for advanced DRAM nodes** [12055-10]

12055 04 **Establishing a filter evaluation methodology targeting polymer purification of EUV lithography materials** [12055-6]

RESIST METROLOGY AND ANALYTICS

12055 05 **Nanometrology for evaluating rare sites for molecular homogeneity** [12055-11]

12055 06 **Enhanced catalyst mobility in chemically amplified resists** [12055-1]

12055 07 **To bake or not to bake... : the impact of prebake in the EUV resist process** [12055-14]

12055 08 **Experimental characterization of EUV resist materials: photoelectron spectroscopy** [12055-15]

12055 09 **Swelling and dissolution kinetics of poly(4-hydroxystyrene) in alkaline aqueous solution studied by quartz crystal microbalance (QCM) method** [12055-12]

UNDERLAYERS

12055 0A **Realization of sub-30-pitch EUV lithography through the application of functional spin-on glass** [12055-19]

12055 0B **Thickness dependence of properties of EUV underlayer thin films** [12055-21]

RESIST I: SEQUENTIAL INFILTRATION, DRY AND METAL RESIST

12055 0C **Improving polymethacrylate EUV resists with TiO_2 area-selective deposition** [12055-27]

12055 0D **Perfluoroalkylated metallophthalocyanines as EUV resist candidates** [12055-25]

RESIST II: NON-CAR

12055 0E Improved resolution with main chain scission resists for EUV lithography [12055-33]

12055 0F EUV resist screening update: progress towards high-NA lithography [12055-5]

12055 0G Component optimisation in the multi-trigger resist [12055-36]

12055 0H Scissionable polymer photoresist for EUV lithography [12055-37]

EUV STOCHASTICS: JOINT SESSION WITH CONFERENCES 12051 AND 12055

12055 0I Evaluating nanoscale molecular homogeneity in EUV resists with nano-projectile SIMS [12055-39]

FUNDAMENTALS AND HIGH NA

12055 0J State of polymer chains in alkaline developer studied by dynamic light scattering [12055-2]

12055 0K Resist line edge roughness mitigation at high-NA EUVL [12055-4]

MODELING AND VIRTUAL PREDICTIONS

12055 0L Impacts of process flow, scaling, and variability on interconnect performance [12055-30]

12055 0M Gaining insight into critical dimension sensitivity and uniformity in an SADP based advanced DRAM cut process using virtual fabrication [12055-31]

POSTER SESSION

12055 0N Metal oxide resist (MOR) EUV lithography processes for DRAM application [12055-45]

12055 0O Novel technologies in coater/developer to improve the defectivity for advanced EUV patterning materials [12055-46]

12055 0P Suppressing stochastic interaction to improve EUV lithography [12055-47]

12055 0Q Selective contaminant removal in EUV photoresists using a tailored functionality filter [12055-51]

12055 0R **Calibration of chemically amplified resist model to consider the top loss in projection lithography** [12055-52]

12055 0S **Examining strategies to control gel-like defects in EUV patterning materials** [12055-53]

12055 0T **Prediction of line-and-space pattern after etching based on scanning electron microscope image of corresponding resist pattern using machine learning** [12055-54]

12055 0U **Continuous improvement of defectivity rate and CD uniformity in immersion lithography via track co-optimization method** [12055-55]

12055 0V **Removing metallic contaminants from photochemical solvents using advanced purification technologies** [12055-57]

12055 0W **Lowering the photoresist swing effect to increase the lithographic critical dimension uniformity: one step ahead in perfecting the dual Damascene module** [12055-7]

Conference Committee

Symposium Chair

Kafai Lai, University of Hong Kong (United States)

Symposium Co-Chair

Qinghuang Lin, LAM Research Corporation (United States)

Conference Chair

Daniel P. Sanders, IBM Research - Almaden (United States)

Conference Co-Chair

Douglas Guerrero, Brewer Science, Inc. (United States)

Conference Program Committee

Gilles R. Amblard, SAMSUNG Austin Semiconductor LLC (United States)
Ramakrishnan Ayothi, JSR Micro, Inc. (United States)
Robert L. Brainard, SUNY Polytechnic Institute (United States)
Ryan Callahan, FUJIFILM Electronic Materials U.S.A., Inc. (United States)
James F. Cameron, DuPont Electronics & Imaging (United States)
Sonia Castellanos Ortega, Inpria (United States)
Joy Y. Cheng, Taiwan Semiconductor Manufacturing Company Ltd. (Taiwan)
Ralph R. Dammel, EMD Performance Materials Corporation (United States)
Anuja De Silva, Lam Research Corporation (United States)
Danilo De Simone, IMEC (Belgium)
Roel Gronheid, KLA-Tencor/ ICOS Belgium (Belgium)
Masahiko Harumoto, SCREEN Semiconductor Solutions Company, Ltd. (Japan)
Clifford L. Henderson, University of South Florida (United States)
Craig D. Higgins, GLOBALFOUNDRIES Inc. (United States)
Christoph K. Hohle, Fraunhofer-Institut für Photonische Mikrosysteme (Germany)
Scott W. Jessen, Texas Instruments Inc. (United States)
Jing Jiang, Applied Materials, Inc. (United States)
Yoshio Kawai, Shin-Etsu Chemical Company, Ltd. (Japan)
Marie E. Krysak, Intel Corporation (United States)

Qinghuang Lin, Lam Research Corporation (United States)
Nobuyuki N. Matsuzawa, Panasonic Corporation (Japan)
Warren Montgomery, Irresistible Materials Ltd. (United States)
Tomohiro Oikawa, Tokyo Ohka Kogyo America, Inc. (United States)
Jara Garcia-Santaclara, ASML Netherlands B.V. (Netherlands)
Mark H. Somervell, Tokyo Electron America, Inc. (United States)
Jason K. Stowers, Inpria Corporation (United States)
Raluca Tiron, CEA-LETI (France)
Thomas I. Wallow, ASML Brion Technologies (United States)
Rudy J. Wojtecki, IBM Research - Almaden (United States)
Aiwen Wu, Entegris, Inc. (United States)
Ankit Vora, Facebook Technologies, LLC (United States)
