Proc. of SPIE Vol. 12365 1236501-1

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

v *Conference Committee*

DIFFUSE OPTICAL IMAGING I

12365 02 **Dual-slope diffuse optical imaging with a modular source-detector array** [12365-1]

MICROSCOPY I

12365 03 **High-resolution human brain 3D reconstruction with light-sheet fluorescence microscopy (Invited Paper)** [12365-9]

12365 04 **Functional imaging of non-human primate visual cortex using a miniaturized lensless microscope** [12365-12]

12365 05 **Two-photon voltage imaging denoising by self-supervised learning** [12365-13]

DIFFUSE OPTICAL IMAGING II

12365 06 **New dual-comb functional Near Infrared Spectroscopy (fNIRS) technique: study of optical properties and perturbation localization** [12365-14]

12365 07 **Fractional amplitude of physiological fluctuations of resting state fNIRS in Alzheimer's disease patient and healthy control** [12365-15]

NOVEL TECHNIQUES

12365 08 **Migration correction technique using spatial information of neuronal images in fiber-inserted mouse under free-running behavior** [12365-22]

12365 09 **In vivo characterization of the near-infrared genetically encoded calcium indicator NIR-GECO2G** [12365-23]

12365 0A **Exploring the Allen mouse connectivity experiments with new neuroinformatic tools for neurophotonics, diffusion MRI and tractography applications** [12365-25]

POSTER SESSION

- 12365 0B **Attention-based CNN-BiLSTM for sleep state classification of spatiotemporal wide-field calcium imaging data** [12365-26]
- 12365 0C **Wearable fNIRS device of higher spatial resolution realized by triangular arrangement of dual-purpose optodes** [12365-27]
- 12365 0D **Custom cannula for in vivo subcortical two-photon microscopy in mouse models of Alzheimer's disease** [12365-28]

Conference Committee

Symposium Chairs

Sergio Fantini, Tufts University (United States)
Paola Taroni, Politecnico di Milano (Italy)

Symposium Co-chairs

Jennifer K. Barton, The University of Arizona (United States)
Wolfgang Drexler, Medizinische Universität Wien (Austria)

Program Track Chairs

Shy Shoham, New York University (United States)
Anna Devor, Boston University (United States)

Conference Chairs

Qingming Luo, Hainan University (China)
Jun Ding, Stanford University School of Medicine (United States)
Ling Fu, Huazhong University of Science and Technology (China)

Conference Program Committee

David A. Boas, Boston University (United States)
Shih-Chi Chen, The Chinese University of Hong Kong
(Hong Kong, China)
Yu Chen, University of Maryland, College Park (United States)
Bernard Choi, Beckman Laser Institute and Medical Clinic
(United States)
Javier DeFelipe, Universidad Politécnica de Madrid (Spain)
Hongwei Dong, University of California, Los Angeles (United States)
Congwu Du, Stony Brook University (United States)
Sergio Fantini, Tufts University (United States)
Na Ji, University of California, Berkeley (United States)
Beop-Min Kim, Korea University (Korea, Republic of)
Pengcheng Li, HUST-Suzhou Institute for Brainmatics (China)
Francesco Saverio Pavone, Laboratorio Europeo di Spettroscopia
Non Lineari (Italy)
Leilei Peng, Wyant College of Optical Sciences (United States)
Darcy S. Peterka, Columbia University (United States)
Claus-Peter Richter, Northwestern University (United States)
Anna W. Roe, Zhejiang University (China)

Oxana V. Semyachkina-Glushkovskaya, Saratov State University
(Russian Federation)

Shy Shoham, NYU Langone Health (United States)

Shaoqun Zeng, Britton Chance Center for Biomedical Photonics
(China)
