SPIE

Volume 12835

Proceedings of SPIE, 1605-7422, V. 12835

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

Optical Fibers and Sensors for Medical Diagnostics, Treatment, and Environmental Applications XXIV,
edited by Israel Gannot, Katy Roodenko, Proc. of SPIE Vol. 12835, 1283501
© 2024 SPIE · 1605-7422 · doi: 10.1117/12.3030059

Proc. of SPIE Vol. 12835 1283501-1

The papers in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. Additional papers and presentation recordings may be available online in the SPIE Digital Library at SPIDigitalLibrary.org.

The papers reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from these proceedings:

Author(s), "Title of Paper," in *Optical Fibers and Sensors for Medical Diagnostics, Treatment, and Environmental Applications XXIV*, edited by Israel Gannot, Katy Roodenko, Proc. of SPIE 12835, Seven-digit Article CID Number (DD/MM/YYYY); (DOI URL).

Paper Numbering: A unique citation identifier (CID) number is assigned to each article in the Proceedings of SPIE at the time of publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online and print versions of the publication. SPIE uses a seven-digit CID article numbering system structured as follows:

- The first five digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc. The CID Number appears on each page of the manuscript.

Contents

vii *Conference Committee*

OPTICAL FIBERS AND SENSORS I

12835 02 **Graphene integrated optical biosensor for detection of breast cancer cell media** [12835-1]

OPTICAL FIBERS AND SENSORS II

12835 03 **Healthcare monitoring systems using mid-infrared and deep ultraviolet spectroscopy (Keynote Paper)** [12835-7]

12835 04 **Temperature profile reconstruction during tumor laser ablation using percutaneous all-fiber smart applicators** [12835-9]

OPTICAL FIBERS AND SENSORS III

12835 05 **New broad spectrum fiber with improved resistance to high power radiation for medical and industrial applications** [12835-15]

OPTICAL FIBERS AND SENSORS IV

12835 06 **Optical fiber-based LSPR biosensor for enhanced dopamine detection: advancing personalized healthcare** [12835-16]

12835 07 **A portable biosensing system using tapered fiber sensors utilizing mode interference** [12835-18]

12835 08 **Designing a ppb-level fiber-optic microphone for photoacoustic spectroscopy of trace gases** [12835-19]

12835 09 **Towards a fiber-optic sensor for monitoring bacterial contaminations in water** [12835-20]

OPTICAL FIBERS AND SENSORS V

- 12835 0A **Toward rapid tuberculosis diagnostics: optical fiber sensor for LAM detection**
[12835-21]
- 12835 0B **Aluminosilicate glass waveguide platform for connecting optical fiber sensors embedded in composite materials** [12835-24]
- 12835 0C **Detection of edible oil adulteration using fiber Bragg grating sensor: a fast and accurate approach** [12835-27]

OPTICAL FIBERS AND SENSORS VII

- 12835 0D **Plasmonic metasurface arrays for cross-reactive sensing (Invited Paper)** [12835-33]
- 12835 0E **Mid-infrared spectroscopy-based sensors for inline water and wastewater analysis** [12835-35]
- 12835 0F **Quantitative SERS analysis of pesticides using printed paper substrates** [12835-37]
- 12835 0G **Experimental research of dynamic long-period fiber gratings based on ultrasound modulation**
[12835-39]

OPTICAL FIBERS AND SENSORS VIII

- 12835 0H **A silicon photonics platform based on Mach Zehnder interferometers for real-time bioprocess monitoring** [12835-41]
- 12835 0I **Multimodal sub-terahertz fiber antenna for environmental and fiber deformation sensing**
[12835-42]

OPTICAL FIBERS AND SENSORS IX

- 12835 0K **Experimental demonstration of power over fiber for optical communication system** [12835-47]
- 12835 0L **Seismic detection through state-of-polarization analysis in optical fiber networks (Invited Paper)** [12835-48]
- 12835 0M **Brillouin scattering-based simultaneous and discriminative strain and temperature sensing with double Brillouin peak fibers** [12835-50]
- 12835 0N **Design trade-offs of ring core fibers (RCFs) for discriminative strain and temperature sensing**
[12835-51]

OPTICAL FIBERS AND SENSORS X

- 12835 0O **Cellulose optical fiber for human health monitoring** [12835-10]
- 12835 0P **Fiber Bragg gratings in carbon-coated glass fibers for monitoring in harsh hydrogen environments** [12835-52]
- 12835 0Q **Evaluation of the impact of LED viewing angle and optical window choice on photoplethysmography signal quality** [12835-23]

Conference Committee

Symposium Chairs

Sergio Fantini, Tufts University (United States)

Paola Taroni, Politecnico di Milano (Italy)

Program Track Chairs

Tuan Vo-Dinh, Duke University (United States)

Anita Mahadevan-Jansen, Vanderbilt University (United States)

Conference Chairs

Israel Gannot, Johns Hopkins University (United States) and Tel Aviv University (Israel)

Katy Roodenko, MAX IR Laboratories (United States)

Conference Program Committee

James P. Clarkin, Polymicro Technologies, A Subsidiary of Molex Incorporated (United States)

Ilko Ilev, U.S. Food and Drug Administration (United States)

Jin U. Kang, Johns Hopkins University (United States)

Pierre Lucas, The University of Arizona (United States)

Yuji Matsuura, Tohoku University (Japan)

Angela B. Seddon, The University of Nottingham (United Kingdom)

Zhenpeng Qin, The University of Texas at Dallas (United States)
