

PROCEEDINGS OF SPIE

Active and Passive Smart Structures and Integrated Systems 2009

Mehdi Ahmadian
Mehrdad N. Ghasemi-Nejhad
Editors

9–12 March 2009
San Diego, California, United States

Sponsored by
SPIE

Cosponsored by
American Society of Mechanical Engineers (United States)

Cooperating Organizations
Intelligent Materials Forum (Japan)
Jet Propulsion Laboratory (United States)
National Science Foundation (United States)

Published by
SPIE

Volume 7288

Proceedings of SPIE, 0277-786X, v. 7288

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

Active and Passive Smart Structures and Integrated Systems 2009, edited by Mehdi Ahmadian,
Mehrdad N. Ghasemi-Nejhad, Proc. of SPIE Vol. 7288, 728801 · © 2009 SPIE · CCC code:
0277-786X/09/\$18 · doi: 10.1117/12.832687

Proc. of SPIE Vol. 7288 728801-1

The papers included in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. The papers published in these proceedings reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from this book:

Author(s), "Title of Paper," in *Active and Passive Smart Structures and Integrated Systems 2009*, edited by Mehdi Ahmadian, Mehrdad N. Ghasemi-Nejhad, Proceedings of SPIE Vol. 7288 (SPIE, Bellingham, WA, 2009) Article CID Number.

Copying of material in this book for internal or personal use, or for the internal or personal use of specific clients, beyond the fair use provisions granted by the U.S. Copyright Law is authorized by SPIE subject to payment of copying fees. The Transactional Reporting Service base fee for this volume is \$18.00 per article (or portion thereof), which should be paid directly to the Copyright Clearance Center (CCC), 222 Rosewood Drive, Danvers, MA 01923. Payment may also be made electronically through CCC Online at copyright.com. Other copying for republication, resale, advertising or promotion, or any form of systematic or multiple reproduction of any material in this book is prohibited except with permission in writing from the publisher. The CCC fee code is 0277-786X/09/\$18.00.

Printed in the United States of America.

Publication of record for individual papers is online in the SPIE Digital Library.

The logo for SPIE Digital Library features the word "SPIE" in a bold, sans-serif font above the words "Digital Library" in a smaller, lighter font. To the right of the text is a stylized graphic consisting of four vertical bars of increasing height from left to right, with a curved line above them.

SPIDigitalLibrary.org

Paper Numbering: Proceedings of SPIE follow an e-First publication model, with papers published first online and then in print and on CD-ROM. Papers are published as they are submitted and meet publication criteria. A unique, consistent, permanent citation identifier (CID) number is assigned to each article at the time of the first publication. Utilization of CIDs allows articles to be fully citable as soon they are published online, and connects the same identifier to all online, print, and electronic versions of the publication. SPIE uses a six-digit CID article numbering system in which:

- The first four digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc.

The CID number appears on each page of the manuscript. The complete citation is used on the first page, and an abbreviated version on subsequent pages. Numbers in the index correspond to the last two digits of the six-digit CID number.

Contents

- xi *Symposium Committee*
xiii *Conference Committee*

PLENARY SESSION

- 7288 02 **Energy harvesting: small scale energy production from ambient sources** [7288-103]
E. M. Yeatman, Imperial College London (United Kingdom)
- 7288 03 **A paleo-aerodynamic exploration of the evolution of nature's flyers, man's aircraft, and the needs and options for future technology innovations** [7288-104]
B. M. Kulfan, Boeing Commercial Airplanes (United States)

MICRO- AND NANO- SYSTEMS

- 7288 04 **Superelastic NiTi thin film small vessel graft for vascular repair** [7288-01]
Y. Chun, D. S. Levi, K. P. Mohanchandra, F. Vinuela, F. Vinuela Jr., G. P. Carman, Univ. of California, Los Angeles (United States)
- 7288 05 **Altering the natural frequencies of cantilevered piezoelectric membranes using negative capacitance circuits** [7288-03]
M. R. Fontaine, M. A. Wickersham, U. A. Korde, South Dakota School of Mines and Technology (United States)
- 7288 06 **Electrospinning fabrication and electrochemical properties of lithium cobalt nanofibers for lithium battery cathode** [7288-04]
Y. Liu, M. Taya, Univ. of Washington (United States)

PZT ENERGY HARVESTING I

- 7288 07 **Generation of electrical energy using short piezoelectric cantilevers in flowing media** [7288-05]
S. Pobering, CiS Research Institute for Micro Sensors and Photovoltaics (Germany);
S. Ebermeyer, N. Schwesinger, Technische Univ. Muenchen (Germany)
- 7288 08 **Comparisons between parallel- and series-SSH1 interfaces adopted by piezoelectric energy harvesting systems** [7288-06]
Y. C. Shu, I. C. Lien, W. J. Wu, S. M. Shiu, National Taiwan Univ. (Taiwan)
- 7288 09 **Vibration analysis of the zigzag micro-structure for energy harvesting** [7288-07]
M. A. Karami, D. J. Inman, Virginia Polytechnic Institute and State Univ. (United States)
- 7288 0A **Development and testing of a MEMS piezoelectric energy harvester** [7288-08]
R. R. Knight, C. Mo, W. W. Clark, Univ. of Pittsburgh (United States)

- 7288 0B **Novel two-stage piezoelectric-based electrical energy generators for low and variable speed rotary machinery** [7288-09]
J. Rastegar, R. Murray, Omnitek Partners, LLC (United States)

PZT ENERGY HARVESTING II

- 7288 0C **Piezoelectric energy harvesting from multifunctional wing spars for UAVs: Part 1. Coupled modeling and preliminary analysis** [7288-10]
A. Erturk, S. R. Anton, D. J. Inman, Virginia Polytechnic Institute and State Univ. (United States)
- 7288 0D **Piezoelectric energy harvesting from multifunctional wing spars for UAVs: Part 2. Experiments and storage applications** [7288-11]
S. R. Anton, A. Erturk, D. J. Inman, Virginia Polytechnic Institute and State Univ. (United States)
- 7288 0E **Novel two-stage piezoelectric-based ocean wave energy harvesters for moored or unmoored buoys** [7288-12]
R. Murray, J. Rastegar, Omnitek Partners, LLC (United States)
- 7288 0F **Development of an innovative energy harvesting device using MFC bimorphs** [7288-13]
M. Tabesh, T. Nguyen, A. M. Mottagh, M. Elahinia, Univ. of Toledo (United States)
- 7288 0G **Piezoelectric resonance shifting using tunable nonlinear stiffness** [7288-14]
T. Reissman, E. M. Wolff, E. Garcia, Cornell Univ. (United States)

BIO-INSPIRED SYSTEMS

- 7288 0H **Incorporation and characterization of biological molecules in droplet-interface bilayer networks for novel active systems** [7288-15]
S. A. Sarles, P. Ghanbari Bavarsad, D. J. Leo, Virginia Polytechnic Institute and State Univ. (United States)
- 7288 0I **New carbon nanotube antenna array simulation and fabrication** [7288-135]
H. Zareie, Univ. of Tehran (Iran, Islamic Republic of); N. Davoudzadeh, Univ. of Tehran (Iran, Islamic Republic of) and Amirkabir Univ. of Technology (Iran, Islamic Republic of); J. Koohsorkhi, S. Mohajerzadeh, N. Rouhi, Univ. of Tehran (Iran, Islamic Republic of)
- 7288 0J **Cruise and turning performance of an improved fish robot actuated by piezoceramic actuators** [7288-17]
Q. S. Nguyen, S. Heo, H. C. Park, D. Byun, N. S. Goo, Konkuk Univ. (Korea, Republic of)
- 7288 0K **Dynamic behavior of LIPCA and modification of a four-bar linkage for mimicking insect flapping frequency** [7288-19]
Q-T. Truong, Q-V. Nguyen, H. C. Park, N. S. Goo, D. Byun, Konkuk Univ. (Korea, Republic of)
- 7288 0L **Actuator placement for a bio-inspired bone-joint system based on SMA** [7288-20]
G. Bunget, S. Seelecke, North Carolina State Univ. (United States)

MR SYSTEMS I

- 7288 0M **Application of self-tuning Gaussian networks for control of civil structures equipped with magnetorheological dampers** [7288-21]
S. Laflamme, J. J. Connor, Massachusetts Institute of Technology (United States)
- 7288 0O **Haptic cue device for accelerator pedal using magnetorheological (MR) fluids** [7288-23]
K. W. Noh, Y. M. Han, S.-B. Choi, Inha Univ. (Korea, Republic of)
- 7288 0P **Nonlinear MR model inversion for semi-active control enhancement** [7288-96]
D. Reader, S. C. Southward, M. Ahmadian, Virginia Polytechnic Institute and State Univ. (United States)

MR SYSTEMS II

- 7288 0R **Rheometer characterization of MR fluids in squeeze mode** [7288-25]
A. Farjoud, M. Ahmadian, R. Cavey, Virginia Polytechnic Institute and State Univ. (United States)
- 7288 0T **Performance robustness of a magnetorheological seat suspension to temperature variations using skyhook control** [7288-27]
N. L. Wilson, N. M. Wereley, Y.-T. Choi, Univ. of Maryland, College Park (United States); G. J. Hiemenz, Techno-Sciences, Inc. (United States); W. Hu, Univ. of Maryland, College Park (United States)
- 7288 0U **Ionic liquids as potential carriers of low viscosity magnetorheological fluids** [7288-28]
C. Guerrero-Sanchez, Eindhoven Univ. of Technology (Netherlands), Dutch Polymer Institute (Netherlands), and Ioniqa Technologies (Netherlands); A. Ortiz-Alvarado, Eindhoven Univ. of Technology (Netherlands); U. S. Schubert, Eindhoven Univ. of Technology (Netherlands), Dutch Polymer Institute (Netherlands), and Friedrich-Schiller-Univ. Jena (Germany)
- 7288 0V **The intelligent seismic retrofitting of structure based on the magnetorheological dampers** [7288-29]
X. Li, Shandong Jianzhu Univ. (China) and Dalian Univ. of Technology (China); H. Li, Dalian Univ. of Technology (China)

ENERGY HARVESTING I

- 7288 0W **On structural effects and energy conversion efficiency of power harvesting** [7288-30]
Y. Liao, H. A. Sodano, Arizona State Univ. (United States)
- 7288 0X **Evaluation of flexible transducers for motion energy harvesting** [7288-32]
M. Collins, S. Behrens, S. McGarry, CSIRO Energy Technology (Australia)

ENERGY HARVESTING II

- 7288 0Y **Results of a water based thermoelectric energy harvesting device for powering wireless sensor nodes** [7288-33]
C. Knight, M. Collins, CSIRO Energy Ctr. (Australia)

- 7288 0Z **Event sensing and energy-harvesting power sources for gun-fired munitions** [7288-34]
J. Rastegar, R. Murray, Omnitek Partners, LLC (United States); C. Pereira, H.-L. Nguyen, U.S. Army Armament Research, Development and Engineering Ctr. (United States)
- 7288 10 **Energy harvesting and wireless energy transmission for embedded sensor nodes** [7288-35]
K. Farinholt, S. Taylor, N. Miller, W. Sifuentes, E. Moro, G. Park, C. Farrar, Los Alamos National Lab. (United States); E. Flynn, D. Mascarenas, M. Todd, Univ. of California, San Diego (United States)
- 7288 11 **Power harvesting for railroad track safety enhancement using vertical track displacement** [7288-36]
C. A. Nelson, Univ. of Nebraska-Lincoln (United States); S. R. Platt, Univ. of Illinois (United States); S. E. Hansen, Univ. of Nebraska-Lincoln (United States); M. Fateh, Federal Railroad Administration (United States)

ENERGY HARVESTING III

- 7288 12 **Development of an aeroelastic vibration power harvester** [7288-37]
M. Bryant, E. Garcia, Cornell Univ. (United States)
- 7288 13 **Optimization of power generation from energy harvesters in broadband stochastic response** [7288-38]
J. T. Scruggs, Duke Univ. (United States)
- 7288 14 **Thermal energy harvesting between the air/water interface for powering wireless sensor nodes** [7288-39]
J. Davidson, James Cook Univ. (Australia); M. Collins, S. Behrens, CSIRO Energy Ctr. (Australia)
- 7288 16 **Combined power harvesting from AC and DC sources** [7288-41]
A. Wickenheiser, E. Garcia, Cornell Univ. (United States)

SHAPE MEMORY ALLOY SYSTEMS

- 7288 17 **Shape-variable sandwich structure with SMA honeycomb core and CFRP skins** [7288-42]
Y. Okabe, H. Sugiyama, Univ. of Tokyo (Japan)
- 7288 18 **Optimal design of a shape memory alloy actuated composite structure with iterative finite element analysis** [7288-43]
R. D. Widdle, Jr., M. T. Grimshaw, M. Shome, Boeing Research and Technology (United States)
- 7288 19 **Cyclic behavior of superelastic shape memory alloy wire for innovative precast concrete frame connections** [7288-45]
H. Qian, Zhengzhou Univ. (China); H. Li, Dalian Univ. of Technology (China); G. Song, Univ. of Houston (United States); H. Chen, Zhengzhou Univ. (China)

- 7288 1A **Design and operation of a fully implantable SMA actuated implant for correcting short bowel syndrome** [7288-46]
B. Utter, J. Luntz, D. Brei, D. Teitelbaum, M. Okawada, E. Miyasaka, Univ. of Michigan (United States)
- 7288 1B **Design and preliminary testing of a handheld antagonistic SMA actuator for cancellation of human tremor** [7288-47]
A. Pathak, D. Brei, J. Luntz, Univ. of Michigan (United States)
- 7288 1C **A bistable mechanism for chord extension morphing rotors** [7288-02]
T. Johnson, M. Frecker, F. Gandhi, Pennsylvania State Univ. (United States)

MR SYSTEMS III

- 7288 1D **Analytical modeling and experimental validation of a magnetorheological mount** [7288-48]
T. Nguyen, Univ. of Toledo (United States); C. Ciocanel, Northern Arizona Univ. (United States); M. Elahinia, Univ. of Toledo (United States)
- 7288 1E **A new model for yield stress of magnetorheological greases/gels under combined effects of magnetic field and temperature** [7288-50]
H. Sahin, X. Wang, F. Gordaninejad, Univ. of Nevada, Reno (United States)

PIEZO SYSTEMS I

- 7288 1F **Vibration control of piezoelectrically actuated microcantilevers** [7288-51]
S. N. Mahmoodi, M. Ahmadian, Virginia Polytechnic Institute and State Univ. (United States)
- 7288 1G **Design and experimental investigations of high power piezoelectric transducers for a novel squeeze film journal bearing** [7288-53]
S. Zhao, Univ. of Paderbron (Germany) and Univ. of Hannover (Germany); J. Twiefel, J. Wallaschek, Univ. of Hannover (Germany)
- 7288 1H **Active and semiactive vibration damping of turbine blades with piezoceramics** [7288-54]
A. Hohl, M. Neubauer, S. M. Schwarzendahl, L. Panning, J. Wallaschek, Institute of Dynamics and Vibration Research (Germany)
- 7288 1I **Precise calculation of piezoelectric switching techniques for vibration damping** [7288-55]
M. Neubauer, J. Wallaschek, Institute for Dynamics and Vibration Research (Germany)

PIEZO SYSTEMS II

- 7288 1J **Vibration control of plates featuring periodic arrays of hybrid shunted piezoelectric patches** [7288-56]
F. Casadei, M. Ruzzene, B. Beck, K. Cunefare, Georgia Institute of Technology (United States)
- 7288 1K **Parameter identification of piezoelectric bimorphs for dynamic applications considering strain and velocity dependent effects** [7288-57]
B. Richter, Heinz Nixdorf Institute (Germany); J. Twiefel, Institute for Dynamics and Vibration Research (Germany)

- 7288 1L **Averaging models for linear piezostructural systems** [7288-58]
W. Kim, A. J. Kurdila, V. Stepanyan, D. J. Inman, Virginia Polytechnic Institute and State Univ. (United States); J. Vignola, Catholic Univ. of America (United States)
- 7288 1M **Changing dynamic behavior of periodic structures by using piezoelectric circuitry with negative resistance** [7288-59]
J. Zhao, X. Wang, J. Tang, Univ. of Connecticut (United States)

PIEZO SYSTEMS III

- 7288 1O **New modular piezo actuator with built-in stress-strain transformation** [7288-61]
T. Rödiger, A. Schönecker, L. Seffner, Fraunhofer Institute for Ceramic Technologies Dresden (Germany); W.-G. Drossel, H. Kunze, H.-J. Roscher, Fraunhofer Institute for Machine Tools and Forming Technology (Germany)
- 7288 1P **Smart adaptronic hydrostatic guiding system for machine tool slides** [7288-62]
C. Munzinger, M. Weis, S. Herder, Univ. Karlsruhe (Germany)
- 7288 1Q **Design of the dual-output piezoelectric transformer based on load current balance** [7288-63]
C. C. Ho, National Taiwan Univ. (Taiwan); Y. P. Liu, National Taiwan Univ. (Taiwan) and Ecole Normale Supérieure de Cachan (France); C. K. Lee, National Taiwan Univ. (Taiwan) and Industrial Technology Research Institute (Taiwan); W. J. Wu, National Taiwan Univ. (Taiwan)

SHAPE MEMORY ALLOY AND POLYMER SYSTEMS

- 7288 1R **Swelling effect actuation of shape-memory polymer: mechanism and demonstration** [7288-64]
H. Lu, J. Leng, Y. Liu, S. Du, Harbin Institute of Technology (China)
- 7288 1T **Shape memory composite deformable mirrors** [7288-66]
M. Riva, P. Bettini, L. Di Landro, G. Sala, Politecnico di Milano (Italy)

INTEGRATED SYSTEMS

- 7288 1U **Integrated design and analysis of smart actuators for hybrid assistive knee braces** [7288-67]
H. T. Guo, W. H. Liao, Chinese Univ. of Hong Kong (Hong Kong, China)
- 7288 1V **Advanced control techniques for post-buckled precompressed (PBP) flight control actuators** [7288-68]
M. Groen, M. Van Schravendijk, Delft Univ. of Technology (Netherlands); R. Barrett, R. Vos, Univ. of Kansas (United States)
- 7288 1W **Optimization of thermoelectric modules based on Mg-Si system** [7288-69]
H. S. Kim, M. Choi, Research Institute of Industrial Science and Technology (Korea, Republic of); K. Kikuchi, Tohoku Univ. (Japan); M. Taya, Univ. of Washington (United States)

PASSIVE AND ACTIVE VIBRATION I

- 7288 1X **Low energy multimodal semi-active control minimizing the number of transducers** [7288-72]
L. Gaudiller, S. Harari, C. Richard, Institut National des Sciences Appliquées de Lyon (France)
- 7288 1Y **Enhanced piezoelectric voltage build-up for semi-active control of smart structures**
[7288-73]
C. Richard, S. Harari, L. Gaudiller, Institut National des Sciences Appliquées de Lyon (France)
- 7288 1Z **Hybrid active/semi-active modal control of smart structures** [7288-74]
S. Harari, C. Richard, L. Gaudiller, Institut National des Sciences Appliquées de Lyon (France)
- 7288 20 **Light weight polarized polypropylene foam for noise shielding** [7288-75]
T. J. Zelfer, D. S. Warne, U. A. Korde, South Dakota School of Mines and Technology
(United States)
- 7288 21 **Corrosion-enabled powering approach for structural health monitoring sensor networks**
[7288-76]
S. A. Ouellette, D. D. L. Mascarenas, M. D. Todd, Univ. of California, San Diego (United States)

PASSIVE AND ACTIVE VIBRATION II

- 7288 23 **Active vibration cancellation of tonal disturbance using orthogonal eigenstructure control**
[7288-78]
M. Rastgaar, Massachusetts Institute of Technology (United States); M. Ahmadian,
S. C. Southward, Virginia Polytechnic Institute and State Univ. (United States)
- 7288 24 **Pushover analysis method for asymmetric structure with passive energy dissipation devices**
[7288-79]
G. Li, H. Li, Dalian Univ. of Technology (China)
- 7288 25 **Full scale tests of all-steel buckling restrained braces** [7288-80]
N. Ma, B. Wu, H. Li, Harbin Institute of Technology (China); J. Ou, Harbin Institute of
Technology (China) and Dalian Univ. of Technology (China); W. Yang, China Institute of
Building Standard Design and Research (China)

PASSIVE AND ACTIVE VIBRATION III

- 7288 26 **Torsionally coupled vibration control of eccentric buildings using liquid dampers** [7288-81]
L. Huo, H. Li, Dalian Univ. of Technology (China)
- 7288 28 **Modal analysis and vibration control of smart hull structure in underwater** [7288-83]
M.-S. Seong, O.-C. Kwon, J.-W. Sohn, S.-B. Choi, Inha Univ. (Korea, Republic of)

PASSIVE AND ACTIVE VIBRATION IV

- 7288 29 **Design and analysis of an adaptive vibration isolation system considering large scale parameter variations** [7288-84]
S.-O. Han, K. Wolf, H. Hanselka, Technische Univ. Darmstadt (Germany); T. Bein, Fraunhofer Institute for Structural Durability and System Reliability (Germany)
- 7288 2A **Genetic algorithm-based multi-objective optimal absorber system for three-dimensional seismic structures** [7288-85]
W. Ren, Hebei Univ. of Technology (China); H. Li, Dalian Univ. of Technology (China); G. Song, Univ. of Houston (United States); L. Huo, Dalian Univ. of Technology (China)
- 7288 2B **Exploration of nonlinear shunting strategies as effective vibration absorbers** [7288-86]
R. Vigu  , G. Kerschen, Univ. de Li  ge (Belgium); M. Ruzzene, Georgia Institute of Technology (United States)
- 7288 2C **Vibration suppression of satellites using multifunctional platforms** [7288-87]
N. Antin, R. Russ, K. Ma, M. N. Ghasemi-Nejhad, Univ. of Hawai'i at Manoa (United States)

PASSIVE AND ACTIVE VIBRATION V

- 7288 2D **Precision tracking control of dual-stage actuation system for optical manufacturing** [7288-89]
W. Dong, J. Tang, Univ. of Connecticut (United States)
- 7288 2E **Nonlinear decentralized control of seismically excited civil structures** [7288-91]
J. Wang, Harbin Institute of Technology (China) and Univ. of Houston (United States); H. Li, Harbin Institute of Technology (China); L. Li, Dalian Univ. of Technology (China) and Univ. of Houston (United States); G. Song, Univ. of Houston (United States)
- 7288 2F **Study of shear-mode piezoelectric patch/complete layer in smart laminated shell panels** [7288-102]
A. R. Daneshmehr, M. B. Chapardar, M. Tanbakouei Kashani, Islamic Azad Univ. (Iran, Islamic Republic of)

Kon-Well Wang, University of Michigan (United States)
Norman M. Wereley, University of Maryland, College Park (United States)

Session Chairs

- 1 Micro- and Nano- Systems
 Nakhiah C. S. Goulbourne, Virginia Polytechnic Institute and State University (United States)
 Seyed Nima Mahmoodi, Virginia Polytechnic Institute and State University (United States)
- 2 PZT Energy Harvesting I
 Alper Erturk, Virginia Polytechnic Institute and State University (United States)
 Roger Stanway, The University of Sheffield (United Kingdom)
- 3 PZT Energy Harvesting II
 Gyuhae Park, Los Alamos National Laboratory (United States)
 Henry A. Sodano, Arizona State University (United States)
- 4 Bio-inspired Systems
 Mehdi Ahmadian, Virginia Polytechnic Institute and State University (United States)
- 5 MR Systems I
 Mehdi Ahmadian, Virginia Polytechnic Institute and State University (United States)
 Fernando D. Goncalves, Lord Corporation (United States)
- 6 MR Systems II
 Faramarz Gordaninejad, University of Nevada, Reno (United States)
- 7 Energy Harvesting I
 Henry A. Sodano, Arizona State University (United States)
 Gyuhae Park, Los Alamos National Laboratory (United States)

- 8 Energy Harvesting II
Diann E. Brei, University of Michigan (United States)
Ephrahim Garcia, Cornell University (United States)
- 9 Energy Harvesting III
Kon-Well Wang, Michigan State University (United States)
- 10 Shape Memory Alloy Systems
S. Nima Mahmoodi, Virginia Polytechnic Institute and State University
(United States)
M. Amin Karami, Virginia Polytechnic Institute and State University
(United States)
- 11 MR Systems III
Norman M. Wereley, University of Maryland, College Park
(United States)
Alireza Farjoud, Virginia Polytechnic Institute and State University
(United States)
- 12 Piezo Systems I
Mehrdad N. Ghasemi-Nejhad, University of Hawai'i at Manoa
(United States)
- 13 Piezo Systems II
Ephrahim Garcia, Cornell University (United States)
- 14 Piezo Systems III
Eric H. Anderson, CSA Engineering, Inc. (United States)
Steve C. Southward, Virginia Polytechnic Institute and State University
(United States)
- 15 Shape Memory Alloy and Polymer Systems
Lingyu Yu, University of South Carolina (United States)
- 16 Integrated Systems
William W. Clark, University of Pittsburgh (United States)
Aditi Chattopadhyay, Arizona State University (United States)
- 17 Passive and Active Vibration I
Mehrdad N. Ghasemi-Nejhad, University of Hawai'i at Manoa
(United States)
- 18 Passive and Active Vibration II
Wei-Hsin Liao, The Chinese University of Hong Kong
(Hong Kong, China)

- 19 Passive and Active Vibration III
Roger Ohayon, Conservatoire National des Arts et Métiers (France)
Mehrdad N. Ghasemi-Nejhad, University of Hawai'i at Manoa
(United States)
- 20 Passive and Active Vibration IV
Amr M. Baz, University of Maryland, College Park (United States)
- 21 Passive and Active Vibration V
Mehrdad N. Ghasemi-Nejhad, University of Hawai'i at Manoa
(United States)
Eric H. Anderson, CSA Engineering, Inc. (United States)
