

PROCEEDINGS OF SPIE

***Technologies for
Synthetic Environments:
Hardware-in-the-Loop XVI***

**Scott B. Mobley
R. Lee Murrer, Jr.**
Editors

**27–28 April 2011
Orlando, Florida, United States**

Sponsored and Published by
SPIE

Volume 8015

Proceedings of SPIE, 0277-786X, v. 8015

SPIE is an international society advancing an interdisciplinary approach to the science and application of light.

The papers included in this volume were part of the technical conference cited on the cover and title page. Papers were selected and subject to review by the editors and conference program committee. Some conference presentations may not be available for publication. The papers published in these proceedings reflect the work and thoughts of the authors and are published herein as submitted. The publisher is not responsible for the validity of the information or for any outcomes resulting from reliance thereon.

Please use the following format to cite material from this book:

Author(s), "Title of Paper," in *Technologies for Synthetic Environments: Hardware-in-the-Loop XVI*, edited by Scott B. Mobley, Lee R. Murrer, Jr., Proceedings of SPIE Vol. 8015 (SPIE, Bellingham, WA, 2011) Article CID Number.

Copying of material in this book for internal or personal use, or for the internal or personal use of specific clients, beyond the fair use provisions granted by the U.S. Copyright Law is authorized by SPIE subject to payment of copying fees. The Transactional Reporting Service base fee for this volume is \$18.00 per article (or portion thereof), which should be paid directly to the Copyright Clearance Center (CCC), 222 Rosewood Drive, Danvers, MA 01923. Payment may also be made electronically through CCC Online at copyright.com. Other copying for republication, resale, advertising or promotion, or any form of systematic or multiple reproduction of any material in this book is prohibited except with permission in writing from the publisher. The CCC fee code is 0277-786X/11/\$18.00.

Printed in the United States of America.

Publication of record for individual papers is online in the SPIE Digital Library.

SPIDigitalLibrary.org

Paper Numbering: Proceedings of SPIE follow an e-First publication model, with papers published first online and then in print and on CD-ROM. Papers are published as they are submitted and meet publication criteria. A unique, consistent, permanent citation identifier (CID) number is assigned to each article at the time of the first publication. Utilization of CIDs allows articles to be fully citable as soon as they are published online, and connects the same identifier to all online, print, and electronic versions of the publication. SPIE uses a six-digit CID article numbering system in which:

- The first four digits correspond to the SPIE volume number.
- The last two digits indicate publication order within the volume using a Base 36 numbering system employing both numerals and letters. These two-number sets start with 00, 01, 02, 03, 04, 05, 06, 07, 08, 09, 0A, 0B ... 0Z, followed by 10-1Z, 20-2Z, etc.

The CID number appears on each page of the manuscript. The complete citation is used on the first page, and an abbreviated version on subsequent pages. Numbers in the index correspond to the last two digits of the six-digit CID number.

Contents

vii Conference Committee

SESSION 1 SCENE SIMULATION: ENABLING TECHNOLOGIES

- 8015 02 **IR emitter non-uniformity correction (NUC): making sense of the data** [8015-01]
J. Oleson, Oleson Convergent Solutions LLC (United States); D. Greer, Naval Air Warfare Ctr. Aircraft Div. (United States)
- 8015 03 **IR imaging bundles for HWIL testing** [8015-02]
B. Shaw, D. Gibson, V. Nguyen, R. Gattass, J. Sanghera, U.S. Naval Research Lab. (United States); I. Aggarwal, Sotera Defense Solutions (United States)
- 8015 04 **MWIR LED performance enhancement by nano-plasmon layer** [8015-03]
N. C. Das, W. Chang, U.S. Army Research Lab. (United States)
- 8015 05 **Contrast analysis for DMD-based IR scene projector** [8015-04]
J. Rentz Dupuis, D. Mansur, OPTRA, Inc. (United States)
- 8015 06 **Multispectral polarized scene projector (MPSP)** [8015-05]
H. Yu, H. Wei, L. Guo, S. Wang, L. Li, J. R. Lippert, Kent Optronics, Inc. (United States); S. Serati, Boulder Nonlinear Systems (United States); N. Gupta, U.S. Army Research Lab. (United States); F. R. Carlen, U.S. Army Aberdeen Test Ctr. (United States)
- 8015 07 **System for driving 2D infrared emitter arrays at cryogenic temperatures** [8015-06]
C. Lange, R. McGee, N. Waite, R. Haislip, F. E. Kiamilev, Univ. of Delaware (United States)

SESSION 2 HWIL IN SYSTEMS INTEGRATION TESTING

- 8015 08 **Enhanced LWIR NUC using an uncooled microbolometer camera** [8015-25]
J. LaVeigne, G. Franks, K. Sparkman, M. Prewarski, B. Nehring, Santa Barbara Infrared, Inc. (United States)
- 8015 09 **Allegany Ballistics Lab: sensor test target system** [8015-08]
D. S. Eaton, Naval Surface Warfare Ctr. Indian Head Div. (United States)
- 8015 0A **Missile airframe simulation testbed: MANPADS (MAST-M) for test and evaluation of aircraft survivability equipment** [8015-09]
J. Clements, U.S. Army Aviation and Missile Command (United States); R. Robinson, L. Bunt, The Aegis Technologies Group, Inc. (United States); J. Robinson, Missile Design (United States)
- 8015 0B **Rapid common hardware-in-the-loop development** [8015-10]
H. J. Kim, U.S. Army Research, Development and Engineering Command (United States); S. G. Moss, The Aegis Technologies Group, Inc. (United States); R. Billings, WideBand Corp. (United States); C. B. Naumann, Optical Sciences Corp. (United States)

SESSION 3 HWIL ENABLING TECHNOLOGIES

- 8015 0C **Calibration and deployment of a new NIST transfer radiometer for broadband and spectral calibration of space chambers (MDXR) [8015-11]**
T. M. Jung, Jung Research and Development Corp. (United States); A. C. Carter, Booz Allen Hamilton Inc. (United States); S. I. Woods, S. G. Kaplan, National Institute of Standards and Technology (United States)
- 8015 0D **Development of technologies for imaging sensor testing at AEDC [8015-12]**
H. Lowry, M. Fedde, D. Crider, H. Horne, J. Gastineau, K. Bynum, S. Steely, J. Labello, Aerospace Testing Alliance (United States)
- 8015 0E **Fine range-motion simulation for hardware-in-the-loop testing of monostatic-pulsed LFM radars [8015-13]**
R. F. Olson, Jr., U.S. Army Aviation and Missile Command (United States)

SESSION 4 SCENE GENERATION TECHNOLOGIES

- 8015 0F **DRDC's approach to IR scene generation for IRCM simulation [8015-14]**
J.-F. Lepage, Defence Research and Development Canada (Canada); M.-A. Labrie, E. Rouleau, J. Richard, LTI Informatique et Génie (Canada); V. Ross, AEREX Avionique Inc. (Canada); D. Dion, N. Harrison, Defence Research and Development Canada (Canada)
- 8015 0G **Real-time maritime scene simulation for ladar sensors [8015-15]**
C. L. Christie, E. T. Gouthas, L. Swierkowski, Defence Science and Technology Organisation (Australia); O. M. Williams, Daintree Systems Pty Ltd. (Australia)
- 8015 0H **High-fidelity real-time maritime scene rendering [8015-16]**
H. Shyu, U.S. Naval Research Lab. (United States); T. M. Taczak, Applied Technology Inc. (United States); K. Cox, Space/Ground System Solutions, Inc. (United States); R. Gover, C. Maraviglia, U.S. Naval Research Lab. (United States); C. Cahill, Envisioneering, Inc. (United States)
- 8015 0I **EO/IR scene generation open source initiative for real-time hardware-in-the-loop and all-digital simulation [8015-17]**
J. W. Morris, U.S. Army Aviation and Missile Research, Development, and Engineering Ctr. (United States); M. Lowry, B. Boren, U.S. Army Redstone Technical Test Ctr. (United States); J. B. Towers, D. E. Trimble, D. H. Bunfield, The AEgis Technologies Group, Inc. (United States)
- 8015 0J **The multispectral advanced volumetric real-time imaging compositor for real-time distributed scene generation [8015-18]**
J. W. Morris, G. H. Ballard, U.S. Army Aviation and Missile Research, Development, and Engineering Ctr. (United States); D. H. Bunfield, T. E. Peddycoart, D. E. Trimble, The AEgis Technologies Group, Inc. (United States)

SESSION 5 FLIGHT MOTION SIMULATION TECHNOLOGY

- 8015 0K **Analysis of a flight motion controller [8015-19]**
T. L. Vu, R. Thamm, Defence Science and Technology Organisation (Australia)

- 8015 0L **Novel distributed real-time control system for a target motion simulator** [8015-20]
R. Hauser, M. Kägi, D. Gunsch, M. van Schalkwyk, P. Waelti, C. Wegmüller, ACUTRONIC
Switzerland Ltd. (Switzerland)
- 8015 0M **GPS synchronization of a motion simulator for hardware-in-the-loop applications** [8015-21]
J. D. Marchetti, Ideal Aerosmith, Inc. (United States)

Author Index

Conference Committee

Symposium Chair

William Jeffrey, HRL Laboratories, LLC (United States)

Symposium Cochair

Kevin P. Meiners, Office of the Secretary of Defense (United States)

Conference Chair

Scott B. Mobley, U.S. Army AMRDEC (United States)

Conference Cochair

R. Lee Murrer, Jr., Millennium Engineering and Integration Co.
(United States)

Program Committee

James A. Annos, U.S. Navy (United States)
Gary H. Ballard, U.S. Army Aviation and Missile Research, Development,
and Engineering Center (United States)
David B. Beasley, Optical Sciences Corporation (United States)
James A. Buford, Jr., Missile Defense Agency (United States)
Dennis H. Bunfield, The AEGIS Technologies Group, Inc. (United States)
Raul Fainchtein, The Johns Hopkins University (United States)
W. Larry Herald, MacAulay Brown Inc. (United States)
Hajin J. Kim, U.S. Army U.S. Army Aviation and Missile Research,
Development, and Engineering Center (United States)
John M. Lannon, Jr., RTI International (United States)
Heard Lowry, Aerospace Testing Alliance (United States)
William M. Lowry, U.S. Army Redstone Technical Test Center
(United States)
Robert W. Mitchell, Ideal Aerosmith, Inc. (United States)
Ronald J. Rapp, Air Force Research Laboratory (United States)
Richard M. Robinson, The AEGIS Technologies Group, Inc.
(United States)
Donald R. Snyder, Air Force Research Laboratory (United States)
Florence C. Solomon, U.S. Air Force (United States)
Leszek Swierkowski, Defence Science and Technology Organisation
(Australia)
Brian K. Woode, Naval Air Warfare Center (United States)

Session Chairs

- 1 Scene Simulation: Enabling Technologies
 David B. Beasley, Optical Sciences Corporation (United States)
 Donald R. Snyder, Air Force Research Laboratory (United States)
 John M. Lannon, Jr., RTI International (United States)

- 2 HWIL in Systems Integration Testing
 Brian K. Woode, Naval Air Warfare Center Aircraft Division
 (United States)
 James A. Buford, Jr., Missile Defense Agency (United States)

- 3 HWIL Enabling Technologies
 Heard Lowry, Aerospace Testing Alliance (United States)
 Ronald J. Rapp, Air Force Research Laboratory (United States)
 Hajin J. Kim, U.S. Army Research, Development and Engineering
 Command (United States)

- 4 Scene Generation Technologies
 James A. Annos, U.S. Navy (United States)
 Dennis H. Bunfield, The Aegis Technologies Group, Inc. (United States)

- 5 Flight Motion Simulation Technology
 R. Lee Murrer, Jr., Millennium Engineering and Integration Co.
 (United States)
 Robert W. Mitchell, Ideal Aerosmith, Inc. (United States)
